

BAD GOLF

Player Guide

Every feature in the Bad Golf app - and exactly how to use it. Your complete field manual from first sign-in to settling the bets.

v2026.11.918 • August 2026

Contents

- 01 Account & Authentication**
- 02 Bad Golf Pro (the gold PRO badge)**
- 03 Home Tab**
- 04 Play / Setup Tab**
- 05 Score Tab**
- 06 Board Tab**
- 07 GPS Rangefinder**
- 08 Apple Watch App**
- 09 Betting Games (35+)**
- 10 Info Tab (Rules & Help)**
- 11 Wager Tab (Friendly Side Bets)**
- 12 Stats Tab**
- 13 Rounds Tab**
- 14 Times Tab (Tee-Time Calendar)**
- 15 Events / Tournaments**
- 16 Smack-Talk / Trash-Talk Voice**
- 17 Crew Tab**
- 18 Common Workflows**
- 19 Glossary**

Account & Authentication

Sign-In Options

Users access **Sign in to Bad Golf** modal from the Stats tab (Account section) or when joining a round.

Sign-in methods:

- **Continue with Google** — OAuth sign-in via Google account
- **Continue with Apple** — sign in with your Apple ID (fully working in the shipped iOS app)
- **Email & password** — Standard email/password authentication

Account creation:

- Tap **Create account** on the sign-in modal
- Enter email and password (minimum 6 characters)
- Set your display name on first sign-in (system asks if no name is linked)

Handicap Ask at Sign-Up (and the "TEMP" Badge)

New players are asked for their handicap the first time they sign in — **including Google and Apple sign-ins**, which used to skip every prompt. It's optional: tap **"Skip"** and you're never nagged again.

- Whatever you type is treated as a **placeholder**, not a real index, and everywhere it appears it's marked **TEMP**.
- Your **Handicap Index** tile shows the number with a **"TEMP"** badge instead of a bare "—".
- Round setup shows a small **"TEMP"** pill beside a player's HCP box whenever that handicap isn't a real established index. It updates live as you type or pick a name.
- The **Share handicap** text and the **Times** tee-time player picker append a plain-text **"(TEMP)"** marker.
- **The Crew leaderboard deliberately never shows a TEMP number** — it shows a real computed index or **"N/A"**. That's the anti-sandbagging rule.
- The Info tab has an explainer card: **"The 'TEMP' badge"**.

Your index replaces the placeholder automatically as soon as you have real rounds.

Profile Editing

Location: Stats tab → Account card → "Edit profile" button or tap your profile photo.

What you can edit:

- **Profile photo** — Tap "Add / change photo" to upload an image from your device; crew sees it as your avatar
- **Display name** — First and last name (editable via "Edit name" button)

- **Email** — View current email address (from authentication provider)
- **Password** — Change password (email sign-in only; OAuth users use their provider)
- **Phone number** — Auto-dashes as you type (e.g., 555-123-4567) via the built-in formatter; used for text settle-up and invites
- **Gender (for handicap rating/slope)** — a **Male / Female** picker ("Gender (for handicap rating/slope)") on the Edit Profile screen. Women golfers are automatically scored against each tee's **women's** rating/slope (when the course has them) so net bets and handicaps are fair. Men's numbers are used by default if gender is unset.

Crew photo / avatar visibility:

- Your photo displays as a small circle avatar in crew lists, live leaderboards, and highlights feed
- If no photo is set, system shows a "?" placeholder

Forms Remember What You Were Typing

Every editor in the app — round setup, the rating/slope editor, the pars/stroke-index editor, the add-past-round grid, tournament day config, edit-name — now **auto-restores what you had typed** if you get interrupted.

- Leave a form half-filled, take a call, come back, and reopening that screen refills it with a toast reading **"←Restored what you were typing."**
 - Auto-restore only applies **within 30 minutes**, only to text boxes (not dropdowns), never overwrites a field the screen already filled in, and never refills search or filter boxes.
 - Tapping into an older field still recovers drafts up to **12 hours** old.
-

Bad Golf Pro (the gold PRO badge)

You'll see a small gold **PRO** pill next to a lot of games and features. Here's exactly what it means today:

Nothing is locked. Every game with a PRO badge is fully selectable and fully playable right now, for everyone. The badge is **informational** — it marks the features that will belong to **Bad Golf Pro** when paid plans launch later.

Tap any **PRO pill** and a short explainer opens:

Pro features — free right now Features with this badge will be part of **Bad Golf Pro** down the road. Nothing is locked today — and as an early member, you'll keep **90 days of Pro free** after plans launch.

Dismiss it with **"Got it"** (or tap the backdrop). On a junk-bet row, tapping the badge opens the explainer **without** switching that bet on.

What's free forever

Four games are permanently free (five tiles, counting the tournament version of Skins):

- **Skins**
- **Nassau** (with Huckle)
- **Match Play**
- **Stroke Play Pot**
- **Tournament Skins** (the event-wide Skins pot) — because it *is* Skins

Free features outside the game list:

- The **whole round experience** — scorecard, putts/GIR/fairway/penalty/sand tracking, live leaderboard, Board tab, settlements
- **Basic GPS** — satellite map, Front/Mid/Back yardages, target drag
- **One-tap settle-up** — Venmo, Cash App, PayPal (never badged, free forever)
- Your **WHS handicap index**, rounds history, and **Add past round**
- The whole **social layer** — Crew, friends, invites, the crew message board, Live Now, spectating, highlights, and the **Wager** tab
- The **Times** tee-time calendar
- **Hydration / drinking games** (they're not bets)
- The **Info tab** help topics — handicap rules, "How handicaps work", "Good to know"

What carries a PRO badge

- **Every other betting game** — Vegas, Dynamic Vegas, Wolf, Banker, 6's, Splix 6's, Niners, Stableford, Bingo Bango Bongo, Quota, Team Quota, Ryder Cup, Scramble, Team Match, Team Low Ball, High &

Low, Hammer, Umbrella, Pot of Gold, and the three round pools (**Low Net Pool**, **GIR Pool**, **Fewest Putts Pool**)

- **Every side bet** — Par 3 Greenie, Closest to the Pin, Long Putt, Long Drive, Birdie Bump, Animals, Marks, Hot Potato
 - **All eight junk bets** — GIR, Sandy, Rolo, Barkie, Polie, Arnie, Chip-In, Snake
 - **The tournament Event Pots** — Low Net, Most GIRs, Fewest Putts, Long Putt, and the Events-tab **Side Pots** row (*new in v918*) — so a game never reads PRO in a normal round and free inside an event
 - **The GPS intelligence layer** — Plays-Like, wind & temperature, the club suggester, and **My Clubs** (badged at their settings screens; no pills are ever drawn on the live GPS heads-up display)
 - **The Apple Watch app**
 - **Shot tracking** — drive auto-estimate and the **My Shots** log
 - **Advanced stat drill-downs** (the basic tiles stay free)
 - **Events / multi-day tournaments** (the "+ New event" button)
 - **Round templates**
 - **Smack-talk voice packs**
-

Home Tab

The Home tab is your dashboard — your handicap, your crew's chatter, every round you're in, and a shortcut to find a course.

Top to bottom: handicap & stat tiles → **Crew card** (message board + highlights) → **"Live now"** → **"Your rounds"** → **Find a Course** → **"Live Holes Across America"**.

Handicap Box (KPI)

Location: Top of Home tab, labeled "Hey [name]"

What it shows:

- **Handicap index** (to one decimal place)
- WHS-style: calculated from your best differentials in the last 20 rounds
- **Provisional** label appears if you have fewer than 5 rounds (calculation still valid, just less stable)
- A **TEMP** badge instead, if all you have is the handicap you typed at sign-up
- **Last round score** (gross) if available
- **Tap the box** to open Stats tab for full handicap details and round history

Handicap calculation:

- Takes 8 of your lowest differentials from your most recent 20 completed 18-hole rounds
- Applies WHS (World Handicap System) logic with adjustments for round counts under 5
- Updates automatically each time you finish a round
- Each tee's rating/slope adjust per-hole handicap on scoring day

Stat tiles: the small tiles under the greeting (Rounds, Avg score, and friends) all **tap through to the round-by-round stat detail popup**. The **Rounds** tile opens that same popup rather than jumping to the Rounds tab.

Home also **redraws itself the moment fresher data lands**, so your photo, handicap, and stats are never stale on a cold open.

Crew Card — Message Board & Highlights

A single card near the top of Home holds your crew's social feed.

Crew message board · friends only

- Post a message straight from the box in the card; posts and replies from your friends appear below it
- The header literally reads **"Crew message board · friends only"** — it is **not** a public wall
- Admins can see the whole board

Crew highlights (below the board)

- Aces, eagles, birdies, and hero moments from the last 24 hours
- Shows **player name**, **hole**, **course**, and **photo** (if available)
- **Fist-bump** — tap the highlight for a quick reaction
- **Comment** — tap the comment icon and type up to 280 characters
- Previews **7** items, with "**Show more (N)**" / "**Show fewer**" to expand up to 40

Refresh (↻) sits in the card header and re-checks live rounds, the board, and highlights.

Everything on Home is friends-only. The old **Friends only / Everyone** scope dropdown was **removed** — Live now, crew highlights, and the message board are permanently limited to you and your accepted friends. Anyone previously set to "Everyone" was switched back automatically.

Live Now

"Live now" card shows:

- Rounds currently in progress by you and your accepted friends (refreshes in real-time)
- Shows **player names**, **course**, and **status** (holes scored so far)
- Tap any row to **spectate** that round (watch their GPS live, see scores update)
- Live rows carry a **red** border and tint so an in-progress round can't be confused with a finished one
- Each live round also carries a **Wager** quick-button

Crew round-start alerts:

- When a friend starts a round with "**Alert friends**" on, you get an **in-app pop-up** and a **push notification** ("*Name* started a round at *Course*, *City*")

"Your rounds" Card

One list for everything you're in — live invites, scheduled rounds, open rounds you joined, tournament group rounds, and your full completed-round history.

Row layout (matches the Events tab exactly): title and subtitle on the left, a status chip, and one small action button on the right.

- **Status chips:** "**LIVE**" (red), "**SCHEDULED**", "**✓ COMPLETE**", "**PAST**"
- **Action button:** "**View**", "**Resume**", or "**Join now**"
- **trophy** next to the course name if the round was part of a **tournament** (ordinary saved rounds don't get one)
- **partner scores** on completed rounds — a second line reading e.g. **Mike 79 · Kevin 82 · Paul 88**, best score first, capped at 5 names with "**+N more**". Solo rounds show nothing extra.
- **Bets button** — see below

- Extra actions sit in a compact wrapped row underneath: **"Edit details"** / **"Edit settings"** on scheduled rounds, **"Scorecard"** / **"GPS preview"** on tournament rounds, **"Leave round"** on a round you didn't create

Loading: only the 10 newest completed rounds draw at first, so the card opens fast. **"Show all N rounds"** (N is the real total) builds the rest — it reads **"Loading..."** while it works — and **"Show fewer"** drops back to 10.

The Bets Sheet

Tap the **Bets** button on any completed round (on Home **or** on the Events tab) to open a full money breakdown for that round. No data loads until you tap it.

What's inside:

- **Game by game** — every money game with each player's green (up) or red (down) amount. Games where everyone is at \$0 are hidden; a round with no money games says so and shows **"All square"**.
- **Settle-up** — the exact who-pays-who lines the text settle-up sends, so the two can never disagree. Payment handles aren't shown on screen (they're still included in the shared text).
- **The full scorecard** — with birdie/eagle circles, strokes-given dots, and skin circles. **Blue** = your group's own skins; **gold** = a tournament-wide field skin; a hole that wins both gets a combined blue+gold ring. Gold fills in a beat after the sheet opens, once the cross-group data loads.
- **Tournament section** (tournament rounds only) — the event name and a **"Tournament Results"** button that opens the tournament leaderboard. The combined payout renders right below it.

The button is hidden on manually logged rounds (there's no game record to read) and on live rounds.

Find a Course & Live Holes Across America

- The **Find a Course** card sits at the bottom of Home, directly above the live-camera section — same search box as always.
- **"Live Holes Across America"** shows live course cameras from around the country.
- **Can't find your course?** Tap the request button, type the name and city, and send it — admins add it (usually within 24h). The request sheet lifts above the on-screen keyboard, scrolls, and won't throw away a half-typed request if you tap the background.

Play Now Quick-Start

" Play now" button

Tap to create and start a new round instantly with:

- Auto-select your nearest or most-played course
- Add crew from your friends list (one tap each)
- Configure bets in two taps (show/hide sections)
- Start playing within 30 seconds

If you already have a **live round** — including a tournament group round someone else launched — Play **resumes it** instead of offering to start a new one.

Play / Setup Tab

The Play / Setup tab is where you create and configure a new round.

Starting a Round

"New round" button (top of Play tab)

Launches the setup flow:

Step 1: Choose a course

- **"Search by course name or state..."** input field
- Browse nearby courses (auto-populated by your location) or type to search
- Tap a course card to select it
- **"View details"** shows par, rating/slope, GPS coverage status

Course status indicators:

-  **complete** — full par + rating + GPS mapped
-  **mapped (needs targets)** — GPS tees & greens mapped, needs fairway centers
-  **partial** — some holes mapped, needs more GPS data
-  **no GPS** — mapped in library but no GPS yet
-  **possible duplicate** — admin flagged

Can't find your course?

- Tap **"Can't find a course?"** button
- Enter course name and city
- Tap **"Send request"** — admins will add it (usually within 24h)

Step 2: Select your tees

- Each course may have multiple tee boxes (Championship, Blue, White, Red, etc.)
- Tap to choose
- **Course Handicap** auto-fills based on your Handicap Index × the tee's slope/rating formula
- You can override the handicap if playing a different set (e.g., team matches with fixed handicaps)
- **"Edit tees"** button (admin only) — add/update tee ratings and slopes

Step 3: Add players

- **"Select a Player"** — one full-width button opens the roster picker (the old separate "Add a Player" button is gone)
- Tap names to add (shows your accepted friends first, then full crew)
- A newly picked player's row **stays expanded** so you can set their handicap right away; reopening a saved round still collapses filled rows

- A **"TEMP"** pill appears beside any handicap that isn't a real established index
- Manually enter a new player with first name, last name, and optional handicap
- Tap **"Invite — share join link"** to send an invite to that player
- Reorder players by dragging the  handle
- **Remove player** — tap the **x** button on their row

Step 4: Choose format & betting games

NOTE

See [Betting Games section](#) for complete rules and options.

Main games (choose one or more — exact in-app labels):

- **Skins** (*free*) — low score wins the hole; ties carry or split
- **Nassau (with Huckle)** (*free*) — front 9 / back 9 / overall; 2–5 players; Huckle press
- **Stroke play pot** (*free*) — lowest total takes the pot
- **Match play (1v1)** (*free*) — head-to-head by holes won (add multiple matches)
- **Banker** — rotating banker plays everyone 1-on-1 each hole
- **Vegas (4 players, 2v2)** — paired-digit scoring, birdie flips, tie escalation
- **Dynamic Vegas (4 players)** — Vegas with partnerships shifting each hole
- **6's / Round Robin (4 players)** — best-ball, partnerships rotate every 6 holes
- **Splix 6's / Split Sixes (3 players)** — 6 pts/hole (4-2-0), buy-in or per-point
- **Niners (5-3-1)** — 3 players, 9 points a hole, optional Blitz
- **Stableford** — points-based (Dbl Eagle 5, Eagle 4, Birdie 3, Par 2, Bogey 1)
- **Bingo Bango Bongo** — 3 pts/hole (first on green, closest, first out)
- **Wolf / Captain** — Wolf rotates; pick partner, Lone Wolf (2x), or Blind Lone Wolf (3x)
- **Hammer** — match play with a doubling cube; Team (2v2) or Individual
- **High & Low (2v2)** — a point for the better low ball, a point for the better high ball
- **Team match play** — any even teams, best-ball per hole
- **Team low ball** — even teams, sum of best-ball over 18
- **Quota (Points)** — Albatross 8/Eagle 6/Birdie 4/Par 2/Bogey 1 vs. your quota
- **Team Quota** — even teams, sum of (points – quota)
- **Ryder Cup (2v2, 3 segments)** — Best Ball / Scramble / Alternate Shot (your order)
- **Scramble (2v2)** — both hit, pick best, repeat
- **Umbrella (4 players, 2v2)** — 5 points a hole, each worth the hole number; sweep all 5 and the hole doubles
- **Pot of Gold** — a cash pot on every hole, weighted by difficulty; low score wins it
- **Animals** — penalty animals pass around; only the last holder pays
- **Marks** — most highlight-reel plays wins, not lowest score
- **Hot Potato** — one token that doubles every time it changes hands

- **Low Net Pool** — everyone antes, lowest net over 18 takes the pot
- **GIR Pool** — everyone antes, most greens in regulation takes the pot
- **Fewest Putts Pool** — everyone antes, fewest total putts takes the pot

Side bets (enable/disable independently):

- **Par 3 Greenie (with Hero Tax)** — closest to pin on par 3s, must make par or better
- **Closest to the Pin** — per-hole payouts, or flip it to **pool mode** for one pot
- **Long Putt** — everyone antes; longest putt of the round takes the pot
- **Long Drive** — everyone antes; longest drive on the designated hole takes the pot
- **Birdie Bump** (*renamed from "Birdie Pool"*) — payouts for birdie / eagle / hole-in-one
- **Junk** — ● GIR, Sandy, Rolo, Barkie, Polie, Snake, Arnie, Chip-In (per-bet toggle & amount)

Player pickers. Most games let you choose exactly who's in, with a chip per player plus **"Select all"** / **"Clear all"** (minimum 2). The three pools, **Long Putt**, and **Long Drive pre-select everyone** the first time you switch them on — you only tap to take someone *out*. A deliberate "Clear all" stays cleared. Games like Skins and Banker still start empty.

Hydration bets (sip trackers — no money): In the drink, Bunker, OB/lost ball, Whiff, Worm burner, Chunk & skull, Three-putt, Loser drinks, Par or drink, Honors pours, Snake, Wolf, Tee box toast, The Turn, 19th hole tally — plus a "Sips-of-water mode" to keep it dry. See the [Hydration Bets table](#) for triggers.

Step 5: Configure scoring rules

Handicap application:

- **Gross** — no handicap strokes
- **Net** — apply handicap strokes per hole (stroke index)
- **Gross & Net** — track both

Round Tracking — a settings-style list with a switch on each row:

Toggle	What it adds
Putts	A counter under each score. With GIRs also on, GIR computes automatically (score – putts ≤ par – 2).
GIRs	Greens in regulation. With putts off, tap the GIR chip on each score row. Fills the GIR junk bet automatically.
Fairways	A hit/miss tap on par 4s and 5s (par 3s have no fairway).
Penalties	A +pen tap beside the fairway chip. Penalty strokes show on the end-of-round scorecard — and this is what auto-fills the Rolo side bet.
Sand saves	A sand tap on every hole — mark it when a player was in a bunker. Par or better from the sand counts as a save and auto-fills the Sandy junk bet.

Totals show on the Board, the final summary, and your lifetime Stats.

Game visibility (who sees what):

- **Everyone** — all rounds visible to all crew (default for public courses)
- **Friends only** — only you and accepted friends see this round
- **Just me** — completely private (you only)

Drive distance estimate:

- Toggle **ON** to enable drive-distance tracking (GPS automatically estimates your drive length)

Other settings:

- **Round pop-ups** — enable/disable notifications for birdies, sips, blowups on this phone
- **Alert friends** — notify friends when round is live

Step 6: Schedule or start

- **"▶ Start round now"** — begins play immediately
- **"Save for later"** — saves setup, starts when you tap again
- All settings remain editable until you hit "▶ Start round now"
- Course scorecards auto-fill next time anyone plays there

Your Setup Is Saved While You Poke Around

Backing out of round setup no longer wipes what you picked.

- Reopen a fresh setup **within 30 minutes** and the whole thing comes back — games, bets, options, players, course — with the toast "**↩Picked up your round setup.**"
- Drafts older than 30 minutes are thrown away so you always start clean.
- The draft is cleared the moment you actually **create** something — starting a round, saving a scheduled round, or saving a template — so a new round can never re-populate last week's players and games.
- The restore never fires for a prefilled setup, a tournament config, an edit-live screen, or the scheduled-round editor.

Invite players (any time during setup or scoring)

- **"Invite players — share the join link"** button
- Creates shareable URL; other players tap to join
- Already-added players see their status (Joined / Not yet joined)

Templates (live)

- Save any round setup as a reusable template: in the schedule flow tick **"Save as reusable template"** (or save an event as a template from its home screen)
 - Templates keep your format, games, and default course; **"Use"** spins up a fresh copy — just add players
 - Templates you created appear in your scheduled-rounds / Events list
-

Score Tab

The Score tab is live during a round — enter scores hole-by-hole and track side bets.

Scorecard Entry

Layout:

- **Hole number** (1–18) with par in parentheses, e.g., "Hole 1 (Par 4)"
- **Player rows** — one per player with score entry field
- **Handicap strokes** shown as small dots under player name (if net game)
- Tap the score field to open the **score entry stepper** (± 1 buttons or type directly)

Scoring rules:

- Scores range 0–15 (capped at double-bogey +3 by default on entry)
- Use **+X** notation for scores over 10 (e.g., "+2" = 12)
- **GIR chip** — if GIR tracking on and putts off, tap to toggle green-in-regulation (score $\leq$ par – 2). On a hole you haven't played yet it reads "**GIR —**", matching the score and putts placeholders
- **Fairway chip** — if fairways tracking on, tap HIT/MISS for par 4s and 5s
- **+pen tap** — if penalties tracking on, sits beside the fairway chip
- **tap** — if sand-save tracking on, available on every hole
- **Putts counter** — if putts tracking on, shows count under the score (tap to edit)

Pars & Stroke Index

Displayed on scorecard:

- **Par column** — fixed for each hole (set during admin course setup)
- **Stroke Index (SI) row** — if course is mapped (1–18 handicap strokes)
- Shown at bottom of scorecard for reference

GIR / Fairways / Putts / Penalties / Sand Saves

Set these five toggles under **Round Tracking** during setup (see [Play / Setup](#)). On the scorecard:

- **Putts** — tap the number under each score to edit
- **GIRs** — tap the chip on each hole if putts is off (manual entry)
- **Fairways** — tap HIT or MISS on par 4s/5s
- **Penalties** — tap **+pen** each time a player takes a penalty stroke
- **Sand saves** — tap **sand** when a player was in a bunker

All of it syncs to your Stats tab and lifetime statistics — and several junk bets fill themselves from it (see below).

Junk Bets That Fill Themselves

Four junk bets now mark themselves off data you're already entering. **A hand-tapped chip always sticks** — a manual add or remove is never overwritten by a later resync.

Bet	Auto-fills when	Needs
● GIR	The tracked GIR is hit	GIR tracking on
Sandy	A hole marked "in the sand" is scored par or better	Sand-save tracking on
Rolo	A penalty stroke and a par-or-better score are both in	Penalties tracking on
Chip-In	Putts for the hole are exactly 0 and the score is par or better	Putts tracking on

Notes worth knowing:

- **Chip-In excludes a score of 1** — a hole-in-one is an ace, not a chip-in. Holing out from the fairway (a wedge for eagle on a par 4, a second shot on a par 5) *does* count.
- **Arnie** requires knowing you missed the green, which only exists when putts are tracked. **If a round tracks Fairways and GIRs but not Putts, Arnie will never award** — turn Putts tracking on if you're playing Arnie.
- Each of these only appears if the round was set up with that bet ticked.

Side Bet Entry

Per-hole rows below player scores:

Par 3 Greenie (on par 3s only, if enabled):

- Tap chips for each player to mark the closest to pin
- If **Hero Tax** is on and a winner is marked:
- Sub-row appears asking "Did the greenie winner 3-putt?"
- Tap to mark — greenie chip crosses out (forfeit) and Hero Tax penalty applies

Closest to the Pin (on qualifying holes, if enabled):

- Tap the winner's name
- Punch in distance: **feet + inches** (e.g., 12 ft 3 in)
- Distance displays on the Board with the pot

Long Putt / Long Drive:

- Tap who currently holds the longest putt and log the distance — update it any time someone drains a longer one
- Long Drive is marked by the organizer on the designated hole (optional yardage; there's no auto-measure)

Junk (side bets):

- Row showing toggles for GIR, Sandy, Rolo, Barkie, Polie, Snake, Arnie, Chip-In
- Tap player names to toggle (multiple players can score the same junk)
- \$ amount per instance set during setup

Hammer (if enabled):

- **Team (2v2)** mode shows the two side-fold buttons
- **Individual** mode shows one "**{Name} declined**" toggle per player, with status text under the buttons explaining who's still in and what happens next

Banker (if enabled):

- Banker row for the hole
- Banker enters min/max range; other players pick their bet
- Presses stack on top (can press up, banker can re-press)

Match play (if enabled):

- Shows current match status (e.g., "You are 2 up")
- One winner per hole; presses apply

Animals / Marks / Hot Potato / Bingo Bango Bongo:

- Each has its own per-hole tap row — tap who earned the animal, the mark, the potato, or each BBB point

Birdie Bump (if enabled):

- Automatically awards \$ for birdie, eagle, or ace from the scorecard
- No manual entry needed — calculated at round end

In a tournament: your foursome's **own group bets** now show their per-hole entry rows too. Par 3 Greenie, Junk, CTP, Long Putt, Long Drive, Hammer, BBB, Animals, Marks, and Hot Potato used to render nothing at all when set as group bets, so there was no way to award them.

Editing Scores

Mid-round edits:

- Tap any score to open the stepper and adjust
- Putts, GIR, fairways, penalties, and sand saves update live
- Settling updates if money games are active

Finishing — and Reopening — a Round

- Tap "**Save and return home**" on the round recap to finish. It sticks now: a weak-signal cloud read can no longer quietly un-finish the round.

- A finished round opens read-only with **"Round complete... Read-only view — tap Reopen to make edits"** and a gold **"Reopen round"** button.
 - Tap **Reopen round**, fix the score or log the missed greenie or long putt, then tap **Finish round** again — **every payout recalculates automatically**.
 - Only one person should edit at a time. Everyone else should back out and back in to see the corrected numbers.
-

Board Tab

The Board tab shows a live leaderboard, cash settlements, and bet details.

The Three-Way Filter

Three buttons sit above Money standings and repaint the whole board in place — no popups, no navigating away:

- **Tournament** (*default*) — team bets, cross-group 1v1s, and every event-wide pot
- **Group bets** — just your own foursome's numbers
- **Total** — everything combined

Your choice is remembered per round. The **Scorecard** shows regardless of which filter is active.

Under **Tournament** or **Total**, the **Putts & GIR** block and the **Scorecard** show **every player in the event**, once each, not just your group.

Live Leaderboard

Leaderboard columns (left-aligned, scrollable):

- **Player name** (with crew photo if available)
- **Score vs. par** (± 0 notation)
- **Money** (or points, depending on game)
- Green chip = winning money
- Red chip = owing money
- Gray chip = even (\$0)
- A thin sub-row under each player shows live running tracking totals, e.g. `24 putts · ● GIR 4/9` — only when the round tracks them

Sorting:

- Tap column headers to sort by name, score, or money
- Default = sorted by money (highest win first)

Net / Gross:

- The leaderboard reflects each game's own setting (net games show net to-par, gross games show gross)
- Tapping any **bet chip** or the **NET bubble** jumps you straight to the Board

Scorecard Circles

- **Blue circle** — your group's own skin
- **Gold circle** — a tournament-wide **field skin**

- **Blue + gold ring** — a hole that won both
- On the **Tournament Results** full scorecard only, birdies circle **blue** and eagles-or-better get a blue **double** circle; every other scorecard in the app keeps the standard green circles

The same gold circles appear on the GPS mini-scorecard and in the Bets sheet.

Bets & Money Chips

Main games summary:

- Each game shows total money by player
- Tap a game row to expand and see per-hole details (if applicable)

Junk bets:

- Collapsed section, tap to expand
- Shows every greenie, sandie, Rolo, etc., with amount and winner

Per-game breakdown table:

- **"Skins won"** shows your **net** (winnings minus buy-in) with the skin count in parentheses, e.g. **+\$13.33 (2)**
- Side-pot columns read plainly — **"Low Net"**, **"Most GIRs"**, **"Fewest Putts"** — and only appear for pots actually turned on
- **A pot that's configured but hasn't paid anyone yet shows as \$0.00** instead of disappearing
- **\$0 friendly bets still show who won** — a green **"W"**, red **"L"**, or **"AS"** in each player's cell
- **"Cross-group bets"**, **"Team bets (A vs B)"**, and **"Group bets"** columns appear whenever there's real data

Settled vs. unsettled:

- During the round: **provisional** money (marked in yellow)
- After round: final settled amounts

Detailed Settlements

After round completion, the round summary is a full-page mobile screen that scrolls as one — buttons included. The old "Settle up" and "By game" sections were replaced by a single **"Final payout"** board that looks identical to the Tournament/Total payout screens. On a tournament round it fills in the whole-event combined number once every group has finished.

- **"Share results"** exports the payout summary as text or image
- **"Text settle-up"** sends SMS to each player with their balance — and automatically upgrades to the **combined event total** once the whole tournament wraps

All 29 money games count toward the "Group bets" figure rolled into Total — Wolf, Vegas, Hammer, Stableford, Umbrella, Pot of Gold and the rest no longer drop out of the combined number.

One-Tap Settle-Up (Venmo · Cash App · PayPal)

The **"Settle up — who pays who"** screen turns every "who owes who" line into a **one-tap payment**. No money ever runs through Bad Golf — the button just opens the other player's Venmo, Cash App, or PayPal **pre-filled with the amount and a note**, so you only have to confirm inside that app.

How it works:

- On each settlement line ("You owe Mike \$12.50"), Bad Golf shows a **pay button for every method the payee has set up** — Venmo, Cash App, and/or PayPal. Their **preferred method** shows first with a ★.
- Tap it → your phone opens that payment app (or its web page) with the **amount already filled in** and a note like "Bad Golf — Cedar Crest, Sat." You just hit send.
- Each line has a **"Mark as paid"** checkbox. Tick it and the line dims with a ✓ — a simple group tracker so everyone can see who's squared up. (It's local to your phone and doesn't change the money math.)
- If a player hasn't added any handles, the line shows a muted **"No payment info — settle in person"** instead, still with the Mark-as-paid checkbox.

Setting up your own handles (so buddies can pay *you*):

- Open **Additional settings** → **Payment handles** (also offered as an optional step the first time you sign in — you can always **Skip** and add them later).
- Enter any of: **Venmo** username (without the @), **Cash App** \$cashtag (without the \$), **PayPal.me** name or link, and pick a **Preferred method**. All fields are optional — fill one, some, or none.
- Privacy: your handles are only visible to the players in your round, and only so they can pay you. Bad Golf never processes or holds the money.

NOTE

Venmo and Cash App need the app installed on the payer's phone to open pre-filled; otherwise the link opens the web page and they can still pay manually. This is a mobile feature — desktop web is view-only for some methods. Payment handles are deliberately *never a Pro feature — settle-up stays free forever*.

GPS Rangefinder

The GPS is the marquee feature — satellite view of every hole with live distances and course overlay.

Launching GPS

From Score tab:

- **"Score" button** (blue pill below the scorecard)
- On a par 4/5: opens full GPS view of the hole
- On a par 3: opens GPS with Par 3 Greenie ready
- **"Track Shot" pill** (below Score button) — manually log a drive distance

Spectate mode:

- From Home tab, tap any live round under "Live now"
- Opens GPS in read-only, following that player's GPS location
- Updates in real-time; location optional (privacy toggle in Stats tab)

Distances to Green

Main readout (center-top):

- **FRONT / MID / BACK** — distance to front, middle, back of green in yards
- Updates as you move the map pin
- **Hole number & Par** shown flanking the Score button
- **Strokes field** (upper-right) — tracks your score if > 0

The map **auto-fits the whole hole** — the green is always in frame, sized to the real yardage bar and score button rather than fixed guesses. It adapts to any device or notch and shows roughly 10% more of the hole than it used to.

The Right-Hand Bubble Stack

Small heads-up bubbles ride down the right side of the GPS screen. Tap one to jump straight to logging that bet.

- **Pot of Gold** — this hole's pot, with a sub-line reading **"\$I n"** or **"+\$X carried"**. The value is computed live for the hole you're standing on: $\text{base} \times (19 - \text{stroke index}) + \text{carry}$, so the pot escalates by hole difficulty, not hole number. (The carry figure is accurate through the last fully-scored hole.)

- **Long Putt** — jumps you to logging the longest putt
- **Long Drive** — the tournament's longest drive
- **Match play status chips** — e.g. **"vs SJ 3 UP"**. These now appear inside a tournament too, for day-level matches, group-level matches, and cross-group 1v1 match/Nassau. Status only — no money on these chips.
- **NET bubble** and bet chips — tap either to jump to the Board

Plays-Like vs. Plays-As (PRO)

"Plays-Like" mode (interactive sheet):

- Shows **your custom club distances** (from My Clubs bag)
- Recommends next club based on:
 - Distance to flag
 - Your bag's yardage ranges
 - Wind and temperature adjustments
- Updates as you adjust the target (drag the flag marker)

"Plays-As" mode (default):

- Shows **amateur yardage averages** (driver ~220, 7-iron ~155, etc.)
- Helps if you don't have custom clubs logged yet

Toggle between them:

- Tap the **Mode toggle** button on GPS overlay

Target Drag & Layup

Target marker (yellow flag):

- Drag anywhere on the map to set your intended shot target
- Distance updates in real-time
- **The map re-frames as you drag** so your ball and the target both stay on screen (zoom is capped) — no more dragging the target off the edge of the map
- Use to plan approach shots, layups, or lay-back strategies

Front/Middle/Back auto-targets:

- Tap distance pill to snap to front, middle, or back of green automatically

Fairway Center

Fairway target (light green dot, if mapped):

- Shows the ideal landing area for par 4s and 5s — the aim point an admin set as the wizard's "target" tap
- The rangefinder uses it to suggest the layup yardage
- Courses must be admin-mapped to show this (par 3s don't display one — the watch/rangefinder always aims a par 3 at the green)

Wind & Temperature (PRO)

Wind panel (left side, if enabled):

- **Direction dial** — shows where wind is blowing TO (not FROM)
- **Speed & color** — 0–5 mph (green), 5–15 mph (yellow), 15+ mph (red)
- **Wind animation** — light streaks drift across the satellite map showing effect

Temperature panel (inline with wind):

- Current temp and "feels like" adjustment
- Affects ball carry distance estimate

Wind & temp toggle:

- Tap the  **wind icon** on GPS overlay to show/hide panels
- Tap the **temp icon** to show/hide temperature

Hole Map

Satellite view:

- Full-color aerial photo of the hole
- Zoom in/out with **+** and **–** buttons (upper-right)
- Tee marker (teeing area), green outline, fairway
- Hazards (water, bunkers) visible in aerial photo

Map controls:

- **Tap & drag** to pan around
- **Pinch to zoom** (mobile) or **±** buttons
- **"Toggle map view"** (admin only) — switch between map and other overlays

Minimize the options panel (phone):

- On the GPS setup screen, tap ▼ (top-right of the options box) to **minimize** the panel and see the whole map
- Tap "↗ **Show options**" to expand it again
- Hole nav recenters the map on the tee when you switch holes

Scorecard Overlay

Score button side-panel:

- Tap "**Score**" again to open live scorecard with all players' scores
- Slide down to see full board
- Tap to edit any score
- Gold tournament field-skin circles show here too
- The circle/square legend renders cleanly (it used to draw over its own labels)

Spectate / Watch Another Player

Live rounds spectate:

- From Home > "Live now" card, tap any player's row
- GPS opens in **spectator mode** (read-only)
- Shows their **live location** (if they toggled share location ON)
- Updates scores and shots in real-time

Switch between players:

- Dropdown at top of GPS: "**Spectating: [Player Name]**"
- Tap to switch to another player in the same round

Drive Distance Estimate (PRO)

Automatic (if toggle ON in setup):

- GPS logs your GPS location at address and compares to ball location after shot
- Shows estimated drive distance on the "**My Shots**" tab (Stats)

Manual (Track Shot button):

- Tap "**Track Shot**" pill (below Score button)
- Confirms distance estimate or lets you type custom yardage
- "**Share it**" button — shares your drive distance shot to crew

Shot Tracking & My Shots Log (PRO)

Tracked shots saved in:

- **Stats tab** → **My Shots** — searchable log of all tracked shots with date, course, conditions

Shot detail:

- Date, hole, course, distance, wind, temp, club used (if logged)
- Tap **x** to delete any shot from your history

Club Suggester & My Clubs / Bag (PRO)

"My clubs" section (Stats tab):

- **Edit your bag:**
 - One input per club with **distance range** (yards)
 - Rename clubs (wedge lofts, etc.)
 - Leave clubs blank to skip them
 - Drag to reorder
- **"Reset to standard bag"** button — restore default clubs

On GPS:

- **Club recommendation** shows on "Plays-Like" sheet based on distance to target
 - Updates as you drag the target marker
 - **"Pick from My Clubs"** button — select manually if auto-pick isn't right
-

Apple Watch App

The Apple Watch companion is **live and working**. Sign in on your iPhone and the watch picks up the round automatically — it shows live rangefinder distances, the wind/slope-adjusted plays-as number, and a suggested club from your bag. No separate watch sign-in.

NOTE

Watch changes ship through the App Store / TestFlight build, not the web build.

What It Shows

Slim readout optimized for wrist:

- **Hole number & par** (e.g., "7 • Par 4")
- **Distance to green** — FRONT / MID / BACK in yards (live rangefinder, from the watch's own GPS)
- **Plays-as number** — wind/slope-adjusted yardage when the " **Plays-as distance on Apple Watch**" toggle (Stats → Round settings) is ON; turn it OFF for plain GPS yardage
- **Suggested club** — pulled from your My Clubs bag for the distance shown
- **Your score**
- *Swipe to navigate holes*

Scoring From Your Wrist

Score a hole on the watch and it now **writes straight through to the phone's active round**.

- The phone shows a toast reading " **Score from your watch saved**" and the score lands on the scorecard
- It goes through the same protected save path as a tap on the phone, so it only fills your own cells and correctly updates GIR / sandy / junk tracking
- **Out of range?** The score queues on the watch and flushes automatically the moment it reconnects
- Scores are ignored if there's no live round, the round is finished, you're in view-only mode, or the round doesn't match
- Wrist-entered scores **stay put** — the phone's sync merges instead of overwriting
- Browsing to a different hole on the watch no longer snaps you back to the phone's hole; the watch only follows when the phone's hole actually changes

GPS Stays Warm (Workout Session)

The watch starts a **golf workout session** when a round goes live and ends it when the round clears, so watchOS keeps the app alive with your wrist down.

- Drop your wrist mid-fairway for a couple of minutes, raise it, and the yardage is there in about a second instead of showing "acquiring..."
- Because it's a real workout, the round also shows up in **Apple Fitness**
- **First run after installing, the watch asks for Health permission when a round starts — tap Allow.** If Health access is declined or unavailable, everything still works; GPS just cold-starts on each raise

Sign-In & Sync

Handoff from phone (live):

- Sign in on the iPhone app and start (or open) a round
- The watch signs in automatically — your identity, round, and mapped greens are pushed over to the wrist
- No separate sign-in on the watch

When it syncs:

- On launch, **on every wrist-raise**, and whenever it reconnects
- **The phone answers even when it's locked in your pocket** — open the watch app and the round and yardages appear on wrist-raise
- Yardages re-hand every 8 seconds during a live round, not just on hole change
- **Finishing the round on the phone clears the watch** — no more staring at yesterday's round

Handoff to Phone

Start on watch, finish on phone:

- Edit a score on watch
 - Tap **"Continue on iPhone"** to switch to the full scorecard
 - Changes sync instantly
-

Betting Games (35+)

This section details every betting game with rules, setup, and payout logic. Four games are free forever — **Skins, Nassau, Match Play, and Stroke Play Pot** — everything else carries a gold **PRO** badge and is still completely unlocked (see [Bad Golf Pro](#)).

Main Games

Skins (free)

- **Players:** 2+
- **Per-hole game**
- **How it works:** The lowest score on a hole wins the "skin" (the dollar value for that hole). If two or more players tie for low, **no one wins** — the skin either **carries over** to the next hole (pot grows) or is **split** among tied players, depending on what you set.
- **Par-or-better requirement (optional):** Turn it on and the low score still has to be **at par or better** to win. Choose **"net par"** (after handicap strokes) or **"gross par"** (raw score). If the leader makes bogey or worse, no one wins and the skin carries (or dies, per your tie rule).
- **Setup options:** dollar value per skin, **tie behavior** (carry / split / none), win requirement (any score / net par / gross par).
- **Payout math:** $\text{pot} \div \text{number of skins won} = \text{per-skin value}$; each player nets their winnings minus their flat buy-in share. The Board shows this as your **net** with the skin count in parentheses, e.g. **+\$13.33 (2)**.
- **In tournaments:** the tie setting is exactly **"No carry overs" / "Carry overs"** — the old "hardest hole countback" tiebreak is gone. A tied hole's skin rolls forward until a hole has a single outright winner.

Nassau (with Huckle) (free)

- **Players:** 2–5 per Nassau. With **2 players** it's head-to-head; with **3+** it becomes group stroke (lowest net wins each segment and collects \$/side from every other player; ties carry to the next segment). Add as many Nassaus as you want, each with its own pair/group and wager.
- **Three separate bets in one:** front 9, back 9, and overall 18 — each worth the same dollar amount.
- **Two scoring formats:** **Stroke play** (default — lowest total wins each segment) or **Match play** (count holes won, e.g. "1 up after 5"; closes when one player can't catch up, "3&2").
- **Special-score bonuses:** on top of the segment bets, every **birdie, eagle, and hole-in-one** pays a bonus from each other player (Albatross pays at the eagle rate).
- **Huckle (the press):** if you're **down 2+** in any segment (strokes in stroke play, holes in match play), you can call a **Huckle** — a fresh side bet for the same dollar amount, between you and the current leader, played from that hole through the end of the segment. The original segment bet still plays out separately.
- **Setup options:** dollar value per side, format (stroke/match), allow Huckles toggle, birdie/eagle/HIO payouts.

- **Quit-early rule:** if only one nine was played, the **overall bet pushes** (so it doesn't double-charge the same nine).

Stroke Play Pot (free)

- **Players:** 2+
- **How it works:** Everyone puts a fixed amount in the pot. **Lowest 18-hole total takes it all** (gross or net, your choice).
- **Example:** 4 players, \$20 buy-in = \$80 pot; the low score wins the whole \$80.
- **Setup options:** buy-in amount, net or gross scoring.
- **Quit-early rule:** settles among everyone who played the round's full (shortened) length.

Match Play (1v1) (free)

- **Players:** Pair players head-to-head; add as many matches as you want, each with its own pair and bet.
- **How it works:** Each pairing plays **match play — count holes won, not strokes**. "1 up" means up by 1 hole. The match **closes when one player can't possibly catch up** ("3&2" = won 3 holes with 2 to play).
- **Example:** \$20 match; you're 2 up after 16 → opponent can win at most 1 of the last 2, match closes, you win \$20.
- **Setup options:** \$ per match, net or gross.

Banker

- **Players:** 3+ (one banker vs. everyone)
- **How it works:** One player is the **banker** each hole. Every other player plays a **1-on-1 match against the banker**, each picking **their own bet** for the hole. The banker plays everyone simultaneously; low score wins each match.
- **Banker rotation:** rotates through the order on **holes 1–15** (configurable cutoff). On the last few holes, the **biggest loser picks** who's banker next.
- **Pressing:** any player can **press** (double their own wager); the banker can **press back**, doubling everyone's bet (stacks on top of player presses). Banker presses are always available even if no player pressed.
- **Birdie auto-double (optional):** if on, anyone making a birdie automatically doubles their match for that hole (or all matches that hole — your choice).
- **Setup options:** net or gross, loser-picks cutoff hole, banker rotation order (setup or random), birdie auto-double behavior.

Vegas (4 players, 2v2)

- **Players:** Exactly 4 (two teams of two)
- **How it works:** Each team's score on a hole is combined into a **two-digit number, lower digit first** — a 4 and a 5 = **45**. The **difference** between the two teams' numbers = points won by the lower team.

- **Team rotation (setup option): Rotate every 6 holes** (default — A&B vs C&D for 1–6, A&C vs B&D for 7–12, A&D vs B&C for 13–18, so everyone partners with everyone) **OR Fixed teams all 18** (the first pairing plays the whole round).
- **Boosts:** a **birdie flips** the opponent's number (5+4 becomes 54 instead of 45), making their number bigger. **Two birdies, or any eagle, also doubles** the hole; two eagles ×4. If **both teams boost, they cancel** — but the next hole still doubles.
- **Tie escalation:** when a hole **ties**, the next hole's bet **doubles** (two ties → 4x, three → 8x, four → 16x). The first hole someone wins clears the streak and resets to 1x. **No cap.**
- **Setup options:** \$ per point, net or gross, team rotation (rotate / fixed).
- **Settle:** one running point total over 18; final swing × \$/point splits between winners and losers.

Dynamic Vegas (4 players)

- **Players:** Exactly 4
- **How it works:** Same paired-score scoring and boost rules as Vegas. The twist: **partnerships shift every hole** based on the previous hole's results.
- **Team formation:** Hole 1 is **random** (deterministic by game code so all phones agree). Holes 2–18: the **highest scorer** on the previous hole partners with the **lowest scorer**; the other two form the second team. Ties reuse the previous hole's pairings.
- **Setup options:** \$ per point, net or gross.
- **Settle:** one running total over 18; final swing × \$/point.

6's / Round Robin (4 players)

- **Players:** Exactly 4 (2v2 teams)
- **How it works:** Partnerships **rotate every 6 holes** so everyone partners with everyone for one segment. **Best ball per team** wins or loses each hole's bet.
- Holes 1–6: A+B vs C+D; holes 7–12: A+C vs B+D; holes 13–18: A+D vs B+C
- Total each segment separately and settle at the end.
- **Setup options:** \$ per hole won, net or gross.

Splix 6's / Split Sixes (3 players)

- **Players:** Exactly 3
- **Also known as:** Split Sixes, the 6-Point Game, or Cricket.
- **How it works:** Stroke play with **6 points per hole** distributed: **4 pts best, 2 pts middle, 0 pts worst**. Ties split evenly (two tie for best = 3-3-0; two tie for second = 4-1-1; all tie = 2-2-2).
- **Betting mode 1 — Per-point value:** settled per hole against the field. The average is always 2 pts ($6 \div 3$). Each point above 2 earns \$value; each below 2 costs \$value. (E.g., \$2/pt, hole 4-1-1 → best +\$4, each tied-second -\$2.)

- **Betting mode 2 — Buy-in pool:** everyone antes; most total points after 18 wins. **Winner takes all** (split on tie) or **80/20** (1st gets 80%, 2nd gets 20%).
- **Setup options:** betting mode, \$/pt or buy-in, payout type, net or gross.

Niners (5-3-1) — the 9-Point Game

- **Players:** Exactly 3 (enforced — Niners needs three).
- **Also known as:** the **9-point game** or **Nines** — if a buddy asks for "9-point," this is it.
- **How it works: 9 points are handed out every hole** based on finish order: **low score = 5, middle = 3, high = 1**. Over 18 holes those points add up; most points wins.
- **Ties split the 9 points evenly:**
 - Two players tie for **low** → **4-4-1**
 - Two players tie in the **middle/high** → **5-2-2**
 - **All three tie** → **3-3-3**
- **Blitz (optional, off by default):** win a hole **outright by 2 or more strokes** and you **sweep all 9 points** for that hole (5-3-1 becomes 9-0-0). A tie for low, or a win by just 1 stroke, still splits normally — Blitz only fires on a clear 2+ stroke blowout. Tap the **"?"** beside the Blitz toggle for the full explanation.
- **Net or gross** — your choice at setup.
- **Two payout modes:**
 - **Pool (buy-in):** everyone antes; **winner takes all** (split on tie) or **80/20** (1st 80%, 2nd 20%).
 - **Per-point:** no buy-in — since the average is always **3 points a hole** ($9 \div 3$), each point above 3 earns \$value and each below costs \$value, settled at round end.
- **Setup options:** payout mode, buy-in or \$/pt, Blitz on/off, net or gross.

Stableford

- **Players:** 2+
- **How it works:** Points-based scoring against par — **Double Eagle = 5, Eagle = 4, Birdie = 3, Par = 2, Bogey = 1, Double bogey or worse = 0**. High score wins; big blowup holes barely matter (they just score 0).
- **Betting mode 1 — Buy-in pool:** everyone antes; most total points wins. **Winner takes all** (ties split) or **80/20** (1st 80%, 2nd 20%).
- **Betting mode 2 — Per-point value:** no buy-in; each pair settles by their **total point difference × \$/pt** at round end.
- **Setup options:** betting mode, \$ buy-in or \$/pt, payout type, net (recommended) or gross.

Bingo Bango Bongo

- **Players:** 2+ (3–4 typical)
- **How it works:** Three points per hole, awarded separately:
- **Bingo** — first player whose ball lands on the green

- **Bango** — closest to the pin once all balls are on the green
- **Bongo** — first player to hole out
- Each point earns the winner **\$X from every other player**.
- **On the score screen:** after entering scores each hole, tap who won Bingo, Bango, and Bongo — the tracker does the math.
- **Setup options:** \$ per point (paid from each other player).

Wolf / Captain

- **Players:** Exactly 4
- **How it works:** The **"Wolf" rotates each hole**. After watching the others tee off, the Wolf either **picks a partner** for that hole (1v1 against the other two) or goes **Lone Wolf** against all three (**2x bet**). Brave Wolves can call **Blind Lone Wolf** before anyone tees off (**3x bet**).
- **Example:** \$2 Wolf bet. You go Lone Wolf — that's \$4. Win → each opponent owes you \$4 (total \$12 for the hole). Lose → you owe \$4 to each.
- **On the score screen:** the Wolf chooses **Pick partner, Lone Wolf (2x), or Blind Lone Wolf (3x) — called before tee**.
- **Setup options:** \$ per hole.

Hammer

- **Players:** 2+ (any number in Individual format; exactly 4 for Team)
- **How it works:** Match play with a **doubling cube**. You play for a base bet each hole, and at any time a player can **"throw the hammer"** to double the stake. The opponent either **accepts** (the bet doubles and they get the hammer next) or **declines** and concedes the hole at the current bet. Low score wins the hole and the pot; **halved holes can carry the pot forward** (optional).
- **Format (setup option) — pick one:**
 - **"Team (2v2)"** (default) — two fixed sides, best ball per side (net or gross), winners split the pot. Declining concedes for both partners at once.
 - **"Individual"** — works with any number of players from 2 up. **Every player declines for themselves**. A player who declines pays the current stake immediately, split among whoever is still in the hole. Among the players still in, the **low score wins that same stake from each other active player**. A tie among active players is a push (the stake carries if carry is on).
- **On the score screen:** Team mode shows the two side-fold buttons. Individual mode shows a **"{Name} declined"** toggle per player, with status text that adapts to how many players are still in.
- **Watch how it works:** the Info tab's Hammer card leads with a **"▶ Watch how it works"** button that plays a short vertical how-to video in the app.
- **Setup gotcha:** the **net-match checkbox defaults to checked (net scoring ON)**. Tapping it turns net **off** — easy to misread as confirming it. If a Hammer round pays on gross when your group expected net, check this box first.
- **Note:** rounds saved before Hammer got its Format option keep playing as **Team**.

⚡High & Low (2v2)

- **Players:** An **even** number, **4+**
- **How it works:** Everyone plays their own ball. **Two points per hole:** one goes to the team with the better **LOW** ball, one to the team with the better **HIGH** ball (in both cases the lower number wins the point). A tied ball **halves** that point.
- **Optional birdie-double.**
- **Settle:** the point difference over the round × your \$/point.
- **Setup options:** \$ per point, birdie-double on/off, net or gross, team picker.

Team Match Play

- **Players:** Any even-sized teams (2v2, 3v3, 4v4...)
- **How it works:** Pick fixed teams up front. Each hole, the **better ball** (lowest score) on each team competes — the team with the lower best ball wins the hole. Match decided hole-by-hole over 18 and closes when a team can't catch up.
- **Setup options:** \$ per player, net or gross, team picker.

Team Low Ball

- **Players:** Any even teams (team picker)
- **How it works:** Same teams as Team match play, but instead of hole-by-hole match play you **sum each team's best ball over all 18 holes**. Lowest total wins.
- **Example:** Team A's combined best balls = 68, Team B's = 71 → Team A wins by 3.
- **Setup options:** \$ per player, net or gross, team picker.

Quota (Points)

- **Players:** 2+
- **How it works:** Each hole earns **Classic Quota points** — **Albatross 8, Eagle 6, Birdie 4, Par 2, Bogey 1, Double bogey or worse 0** (net or gross). Each player has a **quota target: Auto = 36 – handicap** (a 15-handicap → 21) **or Manual**. Your result = **points earned – quota**. The player furthest **over** quota wins.
- **Wager:** Buy-in pool (winner takes all / 80/20) or per-point ((your result – the group average) × \$/pt).
- **In a tournament:** a group's own Quota game settles when **your** round finishes — it's no longer forced into whole-field mode and left open at \$0.

Team Quota

- **Players:** Even teams (2v2, 3v3, ...)
- **How it works:** Each player earns points and carries a quota exactly like Quota. **Team total = sum of each member's (points – quota)**. Higher team total wins.

- **Wager:** per-point (team-total margin $\times$ \$/pt, paid per player) or a fixed pot split by the winning team.

Ryder Cup (2v2, 3 segments)

- **Players:** Exactly 4 (2v2 teams)
- **How it works:** 18 holes split into three 6-hole segments, **each a different format** — **Best Ball** (each plays own ball, team uses lower score), **Scramble** (both hit, pick best, repeat), or **Alternate Shot** (partners share one ball, alternating). **You choose the order of formats at setup.**
- **Scoring:** **1 point** for a hole win, **0.5 each** for a halve, **0** for a loss. After 18, the team with more points wins and collects **point differential $\times$ \$/pt per player.**
- **On the score screen:** Best Ball holes use each player's individual score; Scramble and Alternate Shot holes show a **team score entry panel** — one score per team for that hole.
- **Wager:** \$ per point.

Scramble (2v2)

- **Players:** Two teams of two
- **How it works:** Every shot, **both players hit, the team picks the best shot, and everyone plays from that spot** — repeat until holed. One team score per hole.
- **Wager:** match play (most holes won) or stroke play (lowest 18-hole total). Team scores only, so individual handicaps don't apply.

☂Umbrella (2v2)

- **Players:** Exactly 4 (two teams of two)
- **How it works:** A 2v2 team game where the points **grow all round.** Every hole puts **five points up for grabs, and each point is worth the hole number** — 1 apiece on hole 1, all the way up to 18 apiece on hole 18. The five points each hole:
 - **Low ball** — the team with the single lowest score
 - **Low total** — the team with the lower combined two-ball total
 - **GIR (partner 1)** and **GIR (partner 2)** — one point per partner slot; your player greens in regulation while the matching opponent doesn't
 - **Birdie** — either partner makes a birdie
- **Win a point outright to take it; a tie awards it to nobody.**
- **☂The umbrella (the sweep):** if one team wins **all five** points while the other scores **zero**, that hole's points **double.** A tie on any single point kills the umbrella.
- **Example:** On hole 8 (8 points each) you win low ball, low total, one GIR, and the birdie — $4 \times 8 = 32$ — but they grab the other GIR, so no umbrella. On hole 12 you sweep all five while they get none: $5 \times 12 = 60$, doubled to **120.**
- **Settle:** the running point difference between the teams $\times$ your \$/point, paid per player. Net (by stroke index) or gross.

- **Setup options:** \$ per point, net or gross, team picker.
- **Note:** the two GIR points need **GIR tracking turned on** for the round (Setup → Round Tracking).

Pot of Gold

- **Players:** 2+ (everyone competes for every hole's pot)
- **How it works:** A separate **dollar pot rides on every hole, weighted by difficulty**, and the **low score wins that hole's pot** from everyone else. You set **one base value** and each hole's pot is that base × the hole's difficulty weight — the **hardest hole (stroke index 1) is worth 18× the base**, down to 1× on the easiest.
- **Setting the pots:** at **\$1.00** base, the No. 1 handicap hole is worth **\$18.00**; at **\$0.25** it's **\$4.50**. The tougher the hole, the bigger the money.
- **Carryover (optional):** turn it on and a **tied hole's pot rolls onto the next hole**, building until someone wins it outright (Skins-style). Off, a tie just **splits** that hole's pot among the players who tied.
- **On GPS:** the **Pot of Gold bubble** shows the pot for the hole you're standing on, with **"\$I n"** or **"+\$X carried"** underneath.
- **Example:** \$1.00 base. On the No. 1 handicap hole (\$18) you make the low net — you collect \$18 from each other player. Two players tie the next hole with carryover on, so its pot rolls forward and the following hole plays for its own value plus the carry.
- **Settle:** zero-sum across the group. Gross or net.
- **Setup options:** net or gross, base value, carryover on/off.

Animals

- **Players:** 2+
- **How it works:** A running side game of penalty **animals**. Tap who earns each one as it happens — and **each animal passes to the last player who did it**, so only the **final holder** pays for it at the end of the round.
- **The animals:** **Gorilla** (OB) · **Snake** (3-putt) · **Shark** (water) · **Camel** (bunker) · **Jackal** (shank) · **Dolphin** (two waters) · **Crab** (two bunkers)
- **Cancelling out:** birdies, eagles, and albatrosses — read straight off the scorecard — cancel penalties out.
- **Settle:** net points, per point.
- **Note:** Animals and Long Putt can't run at the same time — both put a putting bet on the board.

Marks

- **Players:** 2+
- **How it works:** A **highlight-reel game — most marks wins, not lowest score**. An erratic ball-striker who makes the flashy plays can beat a steady grinder.

- **Earn a mark for:** GIRs · sandies · chip-ins · **fishies** (par after a penalty) · **darts** (closest on a par 3) · **muscles** (longest drive) — plus birdies, eagles, and albatrosses straight off the card.
- **Settle:** per point.

Hot Potato

- **Players:** 2+
- **How it works:** **One token nobody wants.** Pick a **trigger** at setup — 3-putt, double bogey, OB, or water. Tap who just did it and the potato moves to them — **and DOUBLES every time it changes hands.**
- **Payout:** whoever is holding the potato after the 18th **pays the current value**, split among everyone else. The pressure builds all the way to the clubhouse.
- **Setup options:** trigger, starting value.

Round Pools (whole-group pots)

Three pools where everyone antes the same buy-in and the single best result takes the whole pot; **ties split it evenly.**

How all three behave:

- Nothing pays out until **every player in the pool has all their holes entered** (9-hole rounds work too), so no money shows in the GPS money bubble or the running totals mid-round. The pool only appears once the round is finished — a mid-round leader never looks like they've already won.
- If **nobody qualifies**, the pot is **void** and no money moves. If everyone is dead even, no lines are shown at all.
- **Player picker:** each pool has the standard chip-per-player picker with **"Select all"** / **"Clear all"** (minimum 2). Unlike Skins or Banker, a pool **pre-selects everyone** the first time you switch it on — you only tap to take someone out. A deliberate "Clear all" stays cleared. A player left out neither pays nor can win, **and his unfinished card no longer holds up the payout.**
- **In a tournament:** these three are hidden from the director's Configure Day screen (the Event Pots already cover that), but each foursome can run them as their **own group bet.**

Low Net Pool

- **How it works:** The **lowest NET score over 18** takes the pot.
- **Always uses FULL handicap**, even if the round is set to 50% or 75% — this matches the tournament Low Net Event Pot exactly.
- **Worked example:** 4 players at **\$5** each (\$20 pot). Player A has the best net → **A +\$15**, the other three — **\$5 each.** If A and B tie → **+\$5 / +\$5 / -\$5 / -\$5.**

GIR Pool

- **How it works:** The **most greens in regulation over 18** takes the pot. A green counts from your tracked GIR (or from score minus putts landing two or more under par).
- **Turning this on switches GIR tracking on automatically**, and a toast tells you it did.
- If **nobody makes a single GIR**, the pot is void and no money moves.

Fewest Putts Pool

- **How it works:** The **fewest total putts over 18** takes the pot.
- **Turning this on switches putt tracking on automatically**, and a toast tells you it did.
- You need a putt count on **every hole you score** — a player missing putt data **can't win** it (otherwise not logging putts would beat putting well) but still pays his ante.

Side Bets

Par 3 Greenie (with optional Hero Tax)

- **Applies to:** Par 3 holes only
- **How it works:**
 - On each par 3, mark the player **closest to the pin** on the green
 - **Must make par or better** to win the pot
 - Default: \$5 per other player (configurable)
- **Hero Tax (optional penalty):**
 - If the Greenie winner **3-putts**, two things happen:
 - They **forfeit the greenie payout** entirely (\$0)
 - They **pay each other player a fixed Hero Tax amount** (default \$5)
- Sub-row appears on scorecard asking "Did the greenie winner 3-putt?" — tap to toggle
- Greenie chip gets ~~crossed out~~ to show payout forfeited
- **On scorecard:** Par 3 Greenie row with chips for each player; tap to mark winner
- **In a tournament:** under the **Total** filter, the Greenie card merges **every group's** greenie events into one hole-sorted list
- **Settlement:** Auto-settles at round end
- **Note:** Different from "Junk GIR" (smaller, any hole you stick the green in regulation)

Closest to the Pin

- **Applies to:** Any holes you choose (usually the par 3s — your call)

- **Per-hole mode (default):** The organizer picks which holes qualify. On each qualifying hole, **every player antes** the set amount, the group marks who stuck it closest (**ball must be on the green**), and logs the distance in **feet and inches**. **Closest takes that hole's pot.**
- **Pool mode (toggle in the CTP options panel):** Flip it and CTP becomes **one single pot** instead. Everyone antes once, the player with the **most CTPs takes the pot**, ties split, and it settles only at the end of the round.
- **Money example:** 4 players at \$5. A wins 2 CTPs to B's 1.
- **Pool mode:** A **+\$15**, everyone else **-\$5**.
- **Per-hole mode (unchanged):** A **+\$25**, B **+\$5**, C **-\$15**.
- **Tournament rounds:** entries combine across groups — the closest shot across all groups shows on the tournament card.
- **On scorecard:** row on qualifying holes; tap winner & enter distance.
- **Existing rounds are unaffected** — CTP still defaults to per-hole.

Long Putt

- **How it works:** Everyone antes the set amount. **Whoever makes the longest putt of the round wins the pot.**
- **On the score screen:** tap who currently has the longest putt and log the distance — update it any time someone drains a longer one. The **bubble** on the GPS screen jumps you straight to logging it.
- **In tournaments:** the longest putt across the **entire field** wins one pot.
- **Example:** \$5 Long Putt, 4 players = \$20 pot. Kevin rolls in a 40-footer on 14 and nobody beats it — he takes the \$20.
- **Player picker:** only selected players ante; if the winner isn't in the game, nothing settles. Pre-selects the whole group on first enable.
- **Note:** Long Putt and Animals can't run at the same time.

Long Drive

- **How it works:** Everyone antes; the **longest drive on the designated hole** wins the pot. The organizer marks the winner (and an optional yardage) — **there's no auto-measure.**
- **Now available in normal rounds**, not just tournaments. (Inside a tournament group config it stays hidden — there it's a field-wide game the commissioner decides.)
- **In tournaments:** the longest drive across the whole field takes the prize.
- **Example:** \$5 Long Drive on hole 7, 4 players = \$20. The group marks the bomb of the day and that player collects the pot.
- **Player picker:** same as Long Putt — only selected players ante, pre-selects the whole group on first enable.

Birdie Bump

Renamed. This is the game formerly called "**Birdie Pool.**" Only the display name changed — the game, the money, and all historical bet history are identical, and old rounds still resolve correctly. You'll see "Birdie Bump" everywhere now: the setup tile, the help sheet, the Info tab, the participant picker, money standings, the Board breakdown column, the round summary, and the tournament screens.

- **How it works:** Pays per great shot with **no tracking required** — the calculation reads it straight off your scorecard. Configure **three dollar amounts: birdie, eagle, and hole-in-one.** Any participant who makes one **collects that amount from every other participant.**
- **Example:** \$10 birdie, 4 players → a birdie collects $\$10 \times 3 = \textbf{+\$30}.$
- **In tournaments:** the director can now select Birdie Bump as a **field-wide** Birdie/Eagle/HIO pot at Configure Day level, sitting alongside each group's own version (separate pots, exactly like Skins).
- **Settlement:** auto-settles at round end.

Junk Bets (toggle each independently)

Each junk bet pays **\$X from every other player** to whoever earns it. Multiple players can earn the same junk on a hole, and one player can earn several junks on one hole. Toggle on the Junk row each hole.

Bet	Trigger	Auto-fill
• GIR (Green in Regulation)	Ball on the putting surface in par – 2 shots (1 on a par 3, 2 on a par 4, 3 on a par 5) — any hole	with GIRs tracking on
Sandy	Par or better after being in a bunker	with Sand saves tracking on
Rolo	Par or better after taking a penalty stroke . Example: drive into the water on a par 4, take your drop and the penalty, then hit it close and make the putt for par — that's a Rolo.	with Penalties tracking on
Barkie	Par or better after hitting a tree . Drive ricochets off an oak, you punch out, stick it close, save par.	manual
Polie	Make a long putt — typically 10+ feet (group sets the standard)	manual
Snake	Whoever 3-putts gets the snake ; it passes to the next 3-putter, and whoever holds it at the end pays out (defaults to \$0.50 because it tends to land on the same person)	manual
Arnie	Make par without hitting the fairway or the green in regulation (Arnold Palmer's escape-artist par)	manual — needs Putts tracking on to award at all
Chip-In	Hole out from off the green for par or better (chip, pitch, or fringe putt)	with Putts tracking on — fires when putts = 0 and the score is par or better; a score of 1 (ace) is excluded

- **A hand-tapped chip always sticks.** Manual adds and removals are never overwritten by a later auto-sync.
- **Settlement:** auto-settles at round end.
- **Known limitation:** when junk is configured as a tournament **group** bet, the chips render and are tappable but **GIR / Arnie / Sandy auto-fill doesn't fire** — tap them by hand in that case.

Hydration Bets (sip trackers — no money)

Just-for-fun sip trackers that ride along with any round — **no money changes hands, nothing touches your bets or lifetime stats**, and they're **never** Pro features. Each game adds sips to a player's hole total. Turn on **"Sips-of-water mode"** in Setup to keep it dry. **Auto** games read the scorecard for you; **manual** ones use the chip on the score row. At round end the **Sip totals** card color-codes everyone from green (dry) to red, and the player with the most sips wins **"Do the Dance"** — a tap-to-dismiss dancing-chicken send-off (a nod to the Instagram birdie dance).

Game	Trigger	Sips / Logging
In the drink	Find a water hazard	1 · manual chip
Bunker / Sand trap	End up in a bunker	1 · manual chip
OB / lost ball	Out of bounds or lost ball	2 · manual chip
Whiff	A full air-swing (miss the ball completely)	1 · manual chip
Worm burner	Top it off the tee and dribble it along the ground	1 · manual chip
Chunk & skull	Fat or thin chip that never reaches the green	1 · manual chip
Three-putt	3+ putts on a hole	1 · auto (needs Putts counter on)
Loser drinks	Highest score on the hole (ties → all tied drink)	1 · auto (high score)
Par or drink	Anyone over par drinks — bogey 1 sip, double+ 2	1–2 · auto
Honors pours	Winner of the last hole hands out the sips	1 · auto (last hole's winner)
Snake (hydration)	3-putt holds the snake; holder at hole 18 finishes their drink	holder finishes drink · auto
Wolf	Rides along with the Wolf game — Wolf loses → Wolf drinks; Lone Wolf win → everyone else drinks	1 · auto
Tee box toast	Everyone sips on every tee box	1 each, every tee · auto
The Turn	Finish your drink at the turn (after hole 9)	finish drink · auto
19th hole tally	Don't sip during play — bank every offense and settle at the clubhouse	running total · sums every other hydration game
Sip totals & "Do the Dance"	End-of-round summary — most sips wins the dancing-chicken send-off	—

Changing a Bet Mid-Round

- **Dollar-amount changes apply retroactively to all 18 holes** — including holes already scored.
- Editing a game **after a round has started now actually updates that live round**. A confirmation toast reports what happened, e.g. "Saved — updated 2 already-started rounds with these games" or "Saved for future rounds — 1 group already finished, so it wasn't changed."
- **Already-finished rounds are never retroactively changed.**

- Games you set up the night before show as **checked** the next day, and saving routes them back to the same place instead of creating a duplicate copy.
-

Info Tab (Rules & Help)

The **Info** tab (bottom nav, between Events and Crew) is the app's built-in **rulebook and help center** — the authoritative source for every game's scoring, settlement, and setup.

What's inside:

- **Games** — an expandable card per Main game with **How it works · Example · Setup options** (Skins, Nassau with Huckle, Stroke pot, Banker, Vegas, Dynamic Vegas, 6's, Splix 6's, Niners, Bingo Bango Bongo, Stableford, Wolf/Captain, **Hammer**, Match play, Team match, Team low ball, **High & Low**, Ryder Cup, Scramble, Quota, Team Quota, Umbrella, Pot of Gold, **Animals**, **Marks**, **Hot Potato**, **Low Net Pool**, **GIR Pool**, **Fewest Putts Pool**)
- **Side bets** — Par 3 Greenie (with Hero Tax), Closest to the Pin, **Long Putt**, **Long Drive**, **Birdie Bump**, GIR, Sandy, **Rolo**, Barkie, Polie, Snake, Arnie, Chip-In
- **Hammer video** — the Hammer card leads with a "► **Watch how it works**" button that plays a short vertical how-to video in an in-app popup
- **Auto-fill notes** — Rolo and Chip-In carry an "Auto-fill" paragraph explaining which tracking toggle powers them
- **Hydration** — every sip tracker (In the drink, Bunker, OB/lost ball, Whiff, Worm burner, Chunk & skull, Three-putt, Loser drinks, Par or drink, Honors pours, Snake, Wolf, Tee box toast, The Turn, 19th hole tally, Sip totals & "Do the Dance")
- **Quit-early settlement rules** — how match-style games (Match Play, Nassau, Team Match, Team Low Ball, 6's), the Stroke Pot, and per-hole games each settle if you stop before 18
- **Live tweaks** — dollar-amount changes mid-round apply **retroactively to all 18 holes** (including holes already scored)
- **Handicap, par, stroke-index, and tee rating/slope explainers** — including "The 'TEMP' badge" and "Good to know"

Games and side bets carry the gold **PRO** pill here too (22 of 26 main games and every side bet). The **handicap and help topics are never badged** — they're not games. Hydration entries aren't badged either.

This Info-tab text is the same rule content summarized in the [Betting Games](#) section above.

Wager Tab (Friendly Side Bets)

The **Wager** tab (bottom nav, near Stats) lets you place **friendly, bragging-rights bets on a friend's live round** — **no real money changes hands; it's a ledger**. It's free, not a Pro feature.

Sign-in gated: you must be signed in. The tab shows a "Sign in to wager" gate otherwise.

How it works:

- **Wagers are friends-only** — you can only bet on rounds where you or an accepted friend is playing (live rounds from the last few hours)
- Tap **Live rounds** → **Refresh** to see eligible rounds, then pick one
- Tap **Propose a bet to friends** and choose a wager type:
- **Win pool** — bet on who wins the round
- **Head-to-head** — pick one player to beat another
- **Over/under** — bet a player finishes over or under a number
- Bets are **settled automatically from the final scores**
- Open bets that friends can accept also surface as cards, and live rounds on Home carry a **Wager** quick-button

Send a Wager to a Friend

Any open wager can be **sent straight to a crew-mate** instead of waiting for them to stumble across it.

- On an open wager, tap **"Send to a friend"** and **pick someone from your Crew**.
 - They get a **notification** — in real time if their app is open — and a **wager card lands on their Wager tab**.
 - The card gives them two buttons: **View** (jumps them right into the Wager tab on that bet) and **Decline**.
 - Accepting/viewing applies the wager to their tab so they're in on the action.
-

Stats Tab

The Stats tab is your personal dashboard — handicap, round history, club setup, tracking history, and account management.

Handicap Index (WHS)

Display:

- Large **handicap number** (to one decimal, e.g., 12.5)
- **Status label**: "Established" (5+ rounds), "Provisional · best round avg" (under 5 rounds), or a **TEMP** badge if all you have is the number you typed at sign-up
- **"Share handicap"** button — export your index + recent rounds (a placeholder number is marked "(TEMP)")

How it's calculated:

- **WHS (World Handicap System)** logic
- Uses lowest 8 differentials from your 20 most recent completed 18-hole rounds
- **Differential** = $(\text{Score} - \text{Course Rating}) \times (113 \div \text{Slope})$ — using the **women's** rating/slope for players whose profile gender is Female (when the tee has them)
- Each tee's rating/slope is applied per tee played that round
- Rounds without a complete 18 holes or a rating/slope are skipped
- Fewer than 5 rounds = **provisional** (calculation valid, but labeled as temporary)

Automatic recalculation:

- Your handicap **recalculates automatically** every time you finish a round (or add a past round) — there is no manual "recalculate" button
- The differential for each saved round is re-derived from that course's current tee rating/slope, so correcting a course's rating updates your index next time a round is saved

Differentials & Round History

"Differentials" section:

- List of recent rounds with:
- **Date** and **course name**
- **Gross score** (your total)
- **Differential** (0.0–99.9 format)

- **Tee played** (e.g., Blue, Championship)
- Sortable by date or differential
- Tap any round to view full scorecard

"Add past round" button:

- Upload a round from before you started using Bad Golf
- Enter date, course, gross score, tee, holes played
- If you have tee rating/slope, differential auto-calculates
- Counts toward your handicap if 18 holes + full rating/slope data

Saved rounds list: tournament rounds carry a **trophy** next to the course name here, same as on Home and the Events tab.

Detailed Statistics

Stat tiles (tap any to drill down):

- **GIR %** — greens in regulation percentage (tap for per-hole breakdown)
- **Fairways %** — fairways hit / par 4+5 attempts (tap for per-hole breakdown)
- **Putts / round** — average putts per round (tap for per-hole breakdown)
- **Penalties** and **Sand saves** — if the round tracked them
- **Avg score** — gross score over completed rounds
- **Rounds played** — total rounds in history

Filters:

- **Player select** (dropdown) — view stats for another player in the roster
- **Date range** (optional, typically last 20 rounds shown)

Toggles:

- **All data tracked?** — shows if your rounds have putts/GIR/fairway data; if not, turn on tracking next round
- Clicking any stat card opens a detail view with chart and per-hole breakdown

NOTE

Basic tiles are free; the deeper drill-downs carry a PRO badge.

Round Settings Card (Pop-ups, Smack-Talk, Visibility, Etc.)

"⚙️Settings" section (folded under a collapsible header):

Round pop-ups:

- Toggle ON/OFF — receive push notifications on **this phone** for:
- Birdies & eagles
- Sips (hydration penalties)
- Blowups (double bogey+)

Smack-talk voice:

- Toggle ON/OFF — enable voice callouts on this phone (separate from game)
- **Package selector:** choose generic voice or Spanish (Roland)
- See [Smack-Talk section](#) for details

Stats visibility:

- **Everyone** — all crew can see your rounds, scores, handicap
- **Friends only** — only accepted friends see your stats
- **Just me** — completely private (no crew visibility)

Drive distance estimate:

- Toggle ON/OFF — auto-log drive distances from GPS (requires Start round → GPS)
- Estimates stored in "My Shots" log

Alert friends:

- Toggle ON/OFF — notify friends when you're starting a round (they get an in-app pop-up **and** a push: "Name started a round at Course, City")

Push notifications card:

- Round start, round added, friend requests, tournament group launches, and wager cards
- (The "Monthly handicap summary" toggle was removed — the monthly summary feed no longer runs.)

My Clubs (PRO)

Expandable "My clubs" section:

Purpose: Define your real bag's distance ranges so GPS recommends from **your** clubs instead of amateur averages.

How to set up:

- One input per club (Driver, 3-wood, 2-iron, etc.)
- Enter the **distance range in yards** (e.g., 220–240 for driver)

- Customize labels (e.g., "PW 45°" instead of just "Wedge")
- **Leave blank** to skip clubs you don't carry
- **Drag to reorder** by the  handle
- **"Reset to standard bag"** button — restore default clubs

On GPS:

- GPS recommends your next club based on distances from your bag
- Tap **"Pick from My Clubs"** to override the auto-pick

Examples:

- Driver: 220–240 yards
- 7-iron: 155–170 yards
- Sand wedge: 100–120 yards
- Putter: ● (no yardage needed)

My Shots (PRO)

Expandable "My shots" section:

What's logged:

- **Drive estimates** (from GPS auto-track or manual Track Shot)
- **Tracked shots** (from GPS + any club you labeled)
- Date, hole, course, distance, wind, temp, club

View & manage:

- List shows all tracked shots (searchable, filterable by date/course)
 - Tap a shot to see full details
 - Tap **x** to delete any shot from your history
 - Shots build your real distance numbers over time and help refine My Clubs
-

Rounds Tab

The Rounds tab shows all your past rounds and scheduled upcoming rounds.

Past Rounds List

Display:

- Cards sorted by date (newest first)
- Shows: **Date**, **course**, **players** count, **final score** (gross), **status** (completed/unfinished)
- **trophy** marks a round played as part of a tournament
- Tap a round to view leaderboard, settle-up, or edit (if unfinished)

Search & filter:

- **"Search course or player..."** input — find rounds by course name or player name
- **"Clear all"** button (admin only) — delete entire history (with confirmation)

View Round

Tap any past round card:

- Opens **leaderboard** with final scores, money settled, and banker history (if applicable)
- Tap **"Score"** tab to see hole-by-hole breakdown
- Tap **"Bets"** tab to see all side bets and junk
- **"Close"** button (top-right) — exit round view

Delete Round

During round (unfinished):

- **"Delete round"** button — remove round from your list only
- Other players keep the round
- If it counted toward your handicap, it's removed and your handicap recalculates
- Confirmation: "Delete this round from YOUR list? Everyone else keeps it."

A stranger's round in your list? If someone in the library shares your name, their round can land in your list. Remove it with the **"x"** next to the row and choose **"Just my list"** — **never "Delete for all"**, which would delete someone else's real round.

Manual / Past Round Entries

"Add past round" button:

- *Date picker* — select when you played
- **Course search** — find the course
- **Gross score** — your total
- **Tee selected** — which tees (sets rating/slope for differential)
- **Holes played** — 9 or 18 (needed for handicap)
- Tap **"Save"** — added to your history and recalculates handicap

Scheduled Rounds Personalization

"Scheduled rounds" list (Rounds tab and Events tab):

- The list is **personalized to you** — it shows only scheduled rounds **you're actually in** (you created it or you're listed as a player), still scheduled and not expired, **plus** any templates you created
 - It no longer shows every other user's scheduled rounds
 - Tap a scheduled round to **edit its setup or start it now**; tap a template to load the whole setup into Play to tweak, then Start or re-schedule
 - Phantom **"SCHEDULED"** rows left behind by a duplicate launch clear themselves on the next load
-

Times Tab (Tee-Time Calendar)

The **Times** tab is a shared **tee-time calendar** for you and your crew. It opens on today, shows the next ~30 days at a glance, and pages a full **12 months** ahead so you can see who's playing when, post your own tee times, and fill the open spots — all from your phone. It's free, not a Pro feature.

The Calendar

- Opens on the **current month with today highlighted**; the next 30 days are the focus.
- Use the « » arrows to page months (up to a year out, plus a little way back), or the **"Today"** button to jump home.
- Each day cell shows a **compact count** of how many tee times are on it (e.g. "3 "); days with open public slots get a subtle accent dot.
- **Tap a day** to open that day's tee times in time order — each row shows the time, course, how many spots are open ("2 open / 4"), who's already in, and a **Public / Private** pill.
- **Tap a tee time** for the full roster and the action buttons you're allowed to use (Join, Invite, Add player, Edit, Cancel).
- **Finished rounds don't advertise seats.** A closed row reads **"Played"** or **"Closed"** instead of showing open spots.
- **Past days are read-only** — still visible, but dimmed, with no **" + Add"** control.
- **Duplicate rows collapse.** A round restarted or joined under a second code shows once (the finished one is kept), and a round you deleted on your device stays gone.

Adding a Tee Time

Tap the sticky **" + Add tee time"** button. One form covers a lot of flexibility:

- **Course** — pick from the course library; you can add **several courses** in one batch.
- **Day(s)** — one date, several dates, or a range (e.g. every Saturday this month).
- **Time(s)** — one time, or **several tee times on the same day** (7:40, 7:50, 8:00 — all at once). There's an **"🕒 Auto-fill times"** helper to space them out.
- **Group size** — how many spots the tee time holds (default 4; adjustable). **Open slots = group size – players already in.**
- **Players (optional)** — pre-seat anyone you already know is coming.
- **Public or Private** — **Public** = all your friends/crew can see and join it; **Private** = only the people you invite can see it. You can apply the choice to the whole batch.

Pick 3 courses across 4 Saturdays and Bad Golf creates all 12 tee times together (managed as one series) — each one saved as its own reliable record.

Filling the Spots — Invites & Auto-Add

- **Invite:** tap **"Invite to this tee time"** to send an in-app invite (it lands in their Home invite list with a notification) or open the **share sheet** with a join link for someone not yet in the app. When they accept, they take an open spot.
- **Add player (auto-add):** as the person who created the tee time, you can **add a crew-mate straight into a spot** without waiting for them to accept — they still get a notification ("Tyler added you to a tee time at Cedar Crest, Sat 8:20am") and can drop out if they can't make it.
- **Move players around:** drag anyone (including yourself) between tee times with their dropdown; crew grab whatever opens up.
- When every spot on a tee time fills, it closes and rolls into your **Scheduled Rounds**, ready to start when the day arrives.

Telling Players Apart

Because more people are on the app now, the **player picker** shows a bit more so you never add the wrong "Chris M.":

- **Full names** (e.g. "Christopher Martinez") on the top line, with a second line showing up to two of **crew · home course · handicap** (a placeholder handicap is marked **(TEMP)**).
- **Color-coded avatars** — each player gets a consistent color (when they have no photo), so the same person is the same color everywhere and becomes easy to recognize.
- The list is **ranked** crew first, then whoever you've played with most recently, then alphabetical.

Sharing the Calendar

Tap **"Share calendar"** to open the share sheet with a link. Whoever opens it lands right on the Times tab and sees your **public** (crew/friends-visible) tee times. Private slots never show up through a shared link unless that person was individually invited. If they don't have Bad Golf yet, the link points them to get it first, then drops them on the calendar.

NOTE

Tee times and scheduled rounds are the same family — a round you schedule elsewhere also appears here, and vice-versa. Everything you add saves reliably across your devices and your crew's.

Events / Tournaments

Events (Tournaments 2.0) are big-group outings — 5+ players, multiple carts, one leaderboard. (The "+ New event" button carries a PRO badge.)

Creating a Tournament

"+ New team tournament" or "+ New daily tournament" button:

Tournament types:

- **Team tournament** — 2+ teams compete over multiple rounds (league-style)
- **Daily tournament** — one-day event, many carts, one leaderboard

Setup flow:

1. Enter tournament name and date range
2. Add teams / players
3. Assign courses (one per day if multi-day)
4. Choose betting games (same as regular rounds)
5. Save and share invite link

No accidental duplicates: the create button **disables itself and reads "Creating..."** while the event is being built, with duplicate protection at three layers, so one extra tap can never make two tournaments. Double-tapping launch on game day can't create duplicate rounds either.

Invite players:

- **"Invite friends to this round" / "Share invite link"** — sends a shareable URL
- **Inside a tournament**, that invite now sends an **event link** that lands the joiner on the tournament claim page — "tap your name ... pick YOUR group" — instead of dropping them into the sender's foursome. Non-tournament round invites are unchanged.
- Admins see join status in real-time

Tournament Bets vs. Group Bets

Two clearly distinct screens:

- **"Tournament Bets"** — whole-field games the commissioner sets
- **"Group Bets"** — each foursome's own action

They carry different accent colors on the betting-games card header and Save button so you always know which one you're editing.

Event-wide pots live under **"Set up event-wide pots"** with the subhead **"Whole-field pools — separate from any group's own bets."** Each button shows a green **ON** or muted **off** tag so a configured pot is obvious at a glance. The pots are **Low Net**, **Most GIRs**, **Fewest Putts**, **Long Putt**, plus **Tournament Skins**, **Tournament Nassau**, **CTP**, **Long Drive**, field **Stableford/Quota**, and **Birdie Bump**. The Events-tab **Side Pots** row carries a PRO badge (new in v918).

Configure Day keeps your work: your checked games, participants, and Nassau/Match instances (including each instance's dollar value, format, and pairing) survive backing out — **including leaving by tapping a bottom-nav tab**. Nothing is written to the event until you tap **Save Day**.

Payouts

The Event Leaderboard has one **"Payouts"** section with three full-width buttons, all opening the same mobile-friendly board:

- **"Tournament payout"** — team bets + cross-group 1v1s + every event-wide pot
- **"Group payout"** — just your own group
- **"Total payout"** — everything combined

Total shows a **live provisional board mid-event**, with a small **"Provisional — X of Y groups finished"** notice above it. Every player in the event is listed, **even at \$0.00** — players who only played group-local bets no longer vanish.

"Text everyone — combined payouts" merges every pot — group side bets, cross-group team bets, cross-group 1v1s, and every Tournament pot — into one number per player. It **unlocks once every group in the event has finished**, and the message matches a normal round's recap:

- A title line
- **Standings** — every player, net \$, high to low
- A **Breakdown** line per game/pot, with (W) / (L) / (AS) for \$0 friendly bets
- A **"Settle up:"** header over the transfer list
- **An attached scorecard image covering every player across every group** (labeled "Group N" when there's more than one)

The per-round **"Text settle-up"** button automatically upgrades to send this combined total once the whole event wraps.

Viewing Tournament Details

From the Events tab:

- See all upcoming tournaments
- Tap to view **Leaderboard**, **Schedule**, **Teams**, and **Rules**
- **"View my group's board"** always lands on a read-only Board view — it never drops you into the bets-editing form or hijacks your active round
- **"Tournament Results"** (formerly "Event leaderboard") opens the tournament leaderboard

Live during tournament:

- **Leaderboard updates** in real-time
- **Tap a player** to spectate their GPS
- **You get a push notification when your tournament group's round starts.** Recipients are matched by **account**, not by typed name, so a nickname or middle initial can't silently drop you from tournament pushes.

The field scorecard shows the whole field. Entrants whose cart group never started a round appear as a dimmed dashed row labeled **"not started"** instead of vanishing — so standings showing 5 players and a scorecard showing 4 can't happen. It surfaces the gap; it doesn't invent scores.

Status pill accuracy: an event where all launched groups are finished but some groups never teed off no longer shows a permanent pulsing **"live"** pill — it reads **"N groups not started"** with no live dot, and flips to finished once the last play date has passed.

Finished Events Collapse

Finished tournaments (past, all groups done, or marked complete) render as a **single-line card**: thumbnail, event name, **"N days · tap for results & details"**, a **"Finished"** pill and a **"▼"**.

- Their group and round data **isn't loaded at all** until you tap them, which is why the Events list now opens almost instantly
- Tap a collapsed card to expand just that event (brief load); **"▲ Collapse"** folds it back
- Live and scheduled events are unchanged and stay fully expanded
- The **"Show N past events"** toggle works the same; revealed past events appear collapsed

Empty state: when you have no tournaments or scheduled games, the list is simply blank — the **"Schedule round"** / new-tournament button in the card above is the only call to action.

Past rounds on the Events tab carry the same **Bets** bets button as Home (hidden on manually logged rounds and on live rounds).

Commissioners and admins see every group's card in an event, each with its own Join / View-results button. Regular players still see only their own group. A group's games line shows games configured **anywhere** — pre-launch group bets, Configure Day, or live in-round edits — and cross-group **Match** / **Nassau** shows on **both** groups' cards.

Templates (PRO)

Tournament setups can be saved and reused:

- *From a tournament's home screen, tap **"Save as template"***
 - *The template stores the format, games, and default course (not the players)*
 - ***"Use"** creates a fresh copy to add players to*
 - *Your own templates show in your list — they're personalized to you, not the whole roster*
-

Smack-Talk / Trash-Talk Voice

Smack-talk voice adds spoken roasts and hype during the round. It's an **opt-in** toggle and runs per-phone. (Voice packs carry a PRO badge.)

Enabling Smack-Talk

Location: Stats tab → **Round settings** card → **"Smack-talk voice"** toggle

How it works:

- Toggle ON to hear spoken callouts on **this phone only** (each phone opts in/out independently)
- The voice fires at the **end of each hole** and speaks **at most one line per hole** — so two voices never stack
- Roasts fire on a **blow-up** (double bogey+ / 3-putt / double par); the single worst blow-up of the hole gets roasted
- A **birdie-or-better** triggers hype instead

The Roland Package (full Spanish)

There's a special package tied to the player **Roland** (recognized by name "Roland" / "Castillo"):

- **All of Roland's trash-talk is in Spanish** — his own set of lines (e.g. "¿La Daga Española? Más bien el Desastre Español.") spoken in a **Spanish female voice**
- **Birdie hype in Spanish** (e.g. "¡Ay, papacito, qué grande eres!")
- When Roland makes a birdie-or-better, his **photo pops up full-screen** (gated by Round pop-ups), and his birdie hype takes priority over any roast that hole
- **Round-start announcement** — when a round with Roland kicks off (smack on), the app announces him in Spanish ("¡La Daga Española ha llegado!")
- Everyone **other than Roland** is roasted in **English**

Voice Picker

On the **Round settings** card there's a **system-voice selector** (the **" /voice"** dropdown, default **"Default"**):

- It's populated from your device's installed text-to-speech voices (the closest the OS exposes to its system/ Siri-family voices)
- The chosen voice is used for the **English** (non-Roland) lines; Roland always uses a Spanish female voice
- Changing it previews immediately and persists on that device

Birdie Hype & Photo

On a birdie (smack-talk on):

- *Spoken hype plays (Spanish for Roland with his photo pop-up; English otherwise)*
 - *A **crew highlight** is also posted to the Home feed (unless pop-ups are off), with the player's photo, hole, course, and reaction buttons (fist-bump, comment)*
-

Crew Tab

The Crew tab is your player roster and friend network. It's free — the whole social layer is.

Friends List

"Friends" section (top):

- Shows all **accepted friends** — people you mutually added
- Tap a friend's photo to open their **profile card** with:
 - Handicap index & status
 - Recent rounds & scores
 - **"View all rounds"** button
 - **"Invite to next round"** quick action

Add a friend:

- **" + Add "** button (top-right of Friends section)
- Opens **"Add a friend"** modal with searchable crew list
- Tap a player to send them a friend request
- Modal closes after sending; they get a notification

Player Stats — All Eight Tiles Tap Through

Open a player's card → **Player stats** (this also works from the leaderboard player popup). **All 8 tiles are tappable**, including the two that used to be dead:

- **Rounds** — opens that player's rounds list
- **Lifetime bets** — opens their bet history
- Plus GIR %, Fairways %, Putts, Avg score and the rest

NOTE

(Cosmetic note: where Home hides the putts/GIR/fairway row when there's no data, the Crew stat box shows it as **NA** .)

Crew Management

"Crew" section (below friends):

- Shows all players ever in a round with you (your **shared roster**)
- Tap a player's row to open their profile card (same as friends)
- Player metadata shown: **recent score**, **status** (active/new/inactive)

The Crew leaderboard never shows a self-reported handicap — a player with no computed index reads "N/A", not their TEMP number.

Removing a player from the roster:

- This is an **admin function**
- See [Admin side → User Management](#)

Friend Requests

"Friend requests" section:

- Shows pending requests FROM other players (waiting for your acceptance)
- Each request shows **player name & handicap**
- **Accept** — tap to accept the request; they're now a friend
- **Decline** — tap to ignore (you can add them later)

Notifications & pop-up:

- When someone sends you a friend request, an in-app **friend-request pop-up** appears (with their name) so you can Accept or Decline on the spot
- A badge also appears on the Crew tab

Accepting Friend Requests

When you receive a request:

- **Push notification** (if enabled): "[Player] wants to be your friend"
 - **Crew tab badge** — red dot on Crew tab icon
 - Tap **"Accept"** in the request list to confirm
 - Once accepted, they appear in your Friends list
 - You can now invite each other to live rounds, see each other on Live now, and read each other's posts on the crew message board
-

Common Workflows

Starting Your First Round

1. **Home tab** → "**Play now**" button
2. **Search and select course** (or request if missing)
3. **Pick your tees** (system auto-sets handicap)
4. **"Select a Player"** to add your crew
5. **Toggle betting games** you want (Skins, Nassau, Junk, etc.)
6. **Configure rules:** Gross/Net, and Round Tracking (Putts, GIRs, Fairways, Penalties, Sand saves)
7. **"▶ Start round now"** button
8. **Score Tab** appears — enter scores hole-by-hole
9. **GPS** opens when you tap "Score" button
10. **Board Tab** shows live leaderboard and settlements
11. **"Save and return home"** when you're done — tap **"Reopen round"** later if something needs fixing

Spectating a Friend's Round

1. **Home tab** → **"Live now"** card
2. Tap a friend's live round row
3. **GPS opens in spectator mode** (read-only)
4. See their live location (if they toggled share location ON)
5. Scores update in real-time
6. Tap **player dropdown** to switch between players

Checking What a Round Cost You

1. **Home tab** (or **Events tab**) → **"Your rounds"**
2. Tap the **Bets** button on the completed round
3. Read the game-by-game money, then the who-pays-who lines
4. Scroll down for the full scorecard — **blue circles** are your group's skins, **gold** are tournament field skins
5. On a tournament round, tap **"Tournament Results"** for the whole-event board

Adding Friends & Inviting to Rounds

1. **Crew tab** → **"+ Add"** button

2. **Search** for a player in the crew roster
3. Tap their name → **friend request sent**
4. They see the request in their Crew tab and tap **Accept**
5. Once accepted, "**Invite to next round**" button appears on their profile
6. When creating a new round, tap their name in the player-picker to add them

Inviting to a live round:

- From the invite list, tap a friend to send a game invite. The button changes to "✓ **Invited** — tap to **resend**" — tap again to **resend** the invite (it's re-sent cleanly each time)
- When you **start a round**, anyone already added whose account is linked is **auto-invited** — they get the pop-up without you doing anything
- The invited player sees an " **Game invite**" pop-up with "**Join now**" / "**Ignore**" — tapping **Join now** drops them straight into the round's GPS
- **Inviting from inside a tournament** sends an **event link** — the joiner lands on the claim page and picks their own group

Tracking Your Handicap

1. **Stats tab** → "**Your handicap**" section (top)
2. View: *
3. **Index** (to 1 decimal)
4. **Status** (Established / Provisional / TEMP)
5. **Recent differentials** (tap any round for full scorecard)
6. Tap " **Add past round**" to log rounds you played before using the app
7. Tap "**Share handicap**" to export your index + recent rounds
8. Your index updates automatically each time you finish or add a round — no manual recalculation needed

Using the GPS Rangefinder

1. During a round, tap the "**Score**" button on the Score tab
2. **GPS view opens** with satellite view of the hole, auto-fit so the green is always in frame
3. **FRONT / MID / BACK** distances shown (center-top)
4. **Drag the target marker** (yellow flag) to your intended target — the map re-frames to keep both your ball and the target on screen
5. **Wind panel** (tap ☉ icon) — shows wind direction & speed
6. **Club suggestion** (Plays-Like mode) — tap to switch from Plays-As
7. Check the right-hand bubbles for this hole's **Pot of Gold** value, **Long Putt**, and your match status
8. Tap "**Track Shot**" to log a drive distance estimate

9. Tap **"Score"** to close GPS and enter the score

Marking Junk Bets on Scorecard

1. On the scorecard, scroll to the **Junk row** (below player scores)
2. See toggles for GIR, Sandy, Rolo, Barkie, Polie, Snake, Arnie, and Chip-In
3. **Tap a player's name** to toggle them for that junk on that hole
4. Multiple players can score the same junk
5. **GIR, Sandy, Rolo, and Chip-In fill themselves in** if the round tracks GIRs, Sand saves, Penalties, and Putts respectively — and a manual tap always overrides the auto-fill
6. At round end, **auto-settles** and pays out per configuration

Managing Your Club Distances

1. **Stats tab** → **"My clubs"** (expandable section)
2. **One input per club:**
3. Enter **distance range** in yards (e.g., 220–240 for driver)
4. **Customize label** (e.g., "PW 45°")
5. **Leave blank** to skip clubs you don't carry
6. **Drag**  **to reorder**
7. **"Reset to standard bag"** button to restore defaults
8. Next time you start a round with GPS, **club recommendations** use your distances

Glossary

NOTE

New since the last edition: Bad Golf Pro badges; new games Hammer, High & Low, Animals, Marks, Hot Potato, Low Net Pool, GIR Pool, Fewest Putts Pool; Long Putt and Long Drive in standard rounds; CTP pool mode; the Rolo junk bet; Penalties and Sand saves tracking; Birdie Pool → Birdie Bump; the Bets sheet; the crew message board; watch scoring; and admin State Lock, code-review history, and the GPS compass.

Term	Definition
Handicap Index	Your WHS rating (one decimal); based on best 8 of last 20 round differentials
Differential	$(\text{Score} - \text{Course Rating}) \times (113 \div \text{Slope})$; measures difficulty of a specific round
Course Handicap	$\text{Index} \times (\text{Slope} \div 113) + (\text{Rating} - \text{Par})$; your handicap adjusted to a specific tee
Provisional	Status when < 5 rounds played; calculation is valid but temporary
TEMP	A handicap you typed at sign-up rather than one the app computed. Marked everywhere — and never shown on the Crew leaderboard
PRO badge	A gold pill marking a future Bad Golf Pro feature. Nothing is locked today , and early members keep 90 days of Pro free after plans launch
GIR	Greens in Regulation; ball on the putting surface in par – 2 shots
Stroke Index (SI)	1–18 ranking of holes by difficulty; used to allocate handicap strokes in net games
Net	Score adjusted by handicap strokes (fairness in mixed-ability groups)
Gross	Raw score without handicap adjustments
Best Ball	Team format; each player plays own ball, team takes the lower score per hole
Scramble	Team format; both hit, pick best, repeat (one team score per hole)
Nassau	Three separate 9-hole bets (front, back, overall)
Skins	Lowest score on each hole wins that hole's pot
Field skin	A tournament-wide skin — circled gold on the scorecard (a group's own skin circles blue)
Vegas	2v2 format; scores paired (low digit first) not added
Hammer	Match play with a doubling cube — throw the hammer to double; accept or fold. Team (2v2) or Individual
High & Low	2v2; a point for the better low ball and a point for the better high ball each hole
Animals	Penalty animals (Gorilla, Snake, Shark, Camel, Jackal, Dolphin, Crab) pass to the last offender; only the final holder pays
Marks	Highlight-reel game — most marks wins (GIRs, sandies, chip-ins, fishies, darts, muscles, birdies)
Hot Potato	One token that doubles each time it changes hands; whoever holds it after 18 pays
Umbrella	

Term	Definition
	2v2 points game; five points a hole, each worth the hole number; sweeping all five doubles the hole
Pot of Gold	A cash pot on every hole, weighted by difficulty — base × 18 on the No. 1 handicap hole down to base × 1; optional carryover on ties
Round pool	A whole-group pot — Low Net Pool , GIR Pool , or Fewest Putts Pool . Everyone antes; best result takes it; ties split; pays only when everyone's card is complete
Junk	Side bets triggered by specific outcomes (GIR, Sandy, Rolo, Barkie, Polie, Snake, Arnie, Chip-In)
Rolo	Par or better after taking a penalty stroke. Auto-fills when the round tracks Penalties
Chip-In	Holing out from off the green for par or better. Auto-fills when putts = 0 and the score is par or better (an ace doesn't count)
Par 3 Greenie	Closest to pin on par 3s (must make par or better); with optional Hero Tax penalty
Hero Tax	Penalty: if Par 3 Greenie winner 3-putts, they forfeit payout AND pay each player
Birdie Bump	Automatic payout for birdie/eagle/ace from each player — the game formerly called "Birdie Pool"
Closest to the Pin	Mark the winner on qualifying holes; log distance in feet & inches. Optional pool mode = one pot to the player with the most CTPs
Long Putt / Long Drive	Everyone antes; the longest putt of the round / longest drive on the designated hole takes the pot
Bets sheet ()	The per-round money breakdown — game by game, who-pays-who, and the full scorecard
Fairway Center	Ideal landing zone (green dot on GPS) for par 4s/5s
Verified course	● Course is complete: pars set, tee ratings/slopes filled, GPS mapped, par-4/5 targets placed
State Lock	An admin freeze on a completed state — blocks all admin data writes, never affects play
Tee time	A calendar reservation on the Times tab: a course + date + time + a group size, with named players and open spots
Open slots	Spots still available on a tee time (group size minus players already in)
Niners	The 9-point game for exactly 3 players — 9 points per hole (low 5, mid 3, high 1)
Blitz	Niners option: win a hole outright by 2+ strokes and sweep all 9 points

Tips & Tricks

Make the Most of GPS

- **Before your round:** Set up My Clubs with your real distances (takes 5 min, saves hours of confusion on-course)
- **On each hole:** Drag the target marker to your intended shot (layup vs. flag) to see club recommendations — the map re-frames itself so you never lose the target off-screen
- **Wind mode:** Turn on wind visualization to see how direction/speed affects the ball
- **Watch the bubbles:** the Pot of Gold bubble tells you what this hole is worth before you tee off — the No. 1 handicap hole is the big one
- **Track drives:** Tap "Track Shot" after big drives to log your real distance and refine your club setup over time

Turn On the Right Tracking

- **Putts** unlocks Chip-In auto-fill — and **Arnie won't award at all without it**
- **Penalties** unlocks Rolo auto-fill
- **Sand saves** unlocks Sandy auto-fill
- **GIRs** unlocks the GIR junk bet and the two Umbrella GIR points
- Adding the **GIR Pool** or **Fewest Putts Pool** switches the matching tracker on for you — you'll see a toast saying so

Manage Your Handicap

- **Complete at least 5 rounds** with full 18 holes + tee data before your handicap stabilizes (becomes "Established")
- **Track putts & GIRs** on every round — feeds your statistics and helps spot trends
- **Review your differentials** (Stats tab) to see which rounds count toward your index (best 8 of 20)
- **Share your handicap** (Stats tab → "Share handicap") to prove your legitimacy to other golfers

Run Smooth Rounds

- **Your setup is saved for 30 minutes** — back out to check something and your games, bets, and players are still there when you return
- **Save your setup as a template** — in the schedule flow tick **"Save as reusable template"** so you don't re-configure Skins + Nassau + Junk every Sunday; **"Use"** spins up a fresh copy

- **Create a friends list** (Crew tab) so invites are one-tap and your Home feed is just your crew
- **Set stats visibility** (Stats tab → Settings) to control who sees your rounds (Everyone / Friends only / Just me)
- **Enable pop-up notifications** so you don't miss crew highlights and live round alerts
- **Made a mistake?** Tap **"Reopen round"** on the finished round, fix it, and finish again — every payout recalculates. Just make sure only one person edits at a time

Settle Money Fairly

- **Use the Board tab** for live settlement tracking, and the three-way filter (Tournament / Group bets / Total) to see exactly the slice you care about
- **Tap the button** on any finished round for the full game-by-game breakdown and the who-pays-who lines
- **Tap "Text settle-up"** to send SMS with each player's balance (no app needed to view) — in a tournament it upgrades to the combined event total once every group finishes
- **Add your payment handles** (Additional settings → Payment handles) so your buddies can pay you in one tap
- **Junk auto-settles** — don't manually calculate greenies, sandies, Rolos, etc.; the app does it
- **Review the breakdown** (after round → "Share results") before asking for payment
